SYMPTOM

SYNDROM

DIAGNOSE

DIAGNOSE =

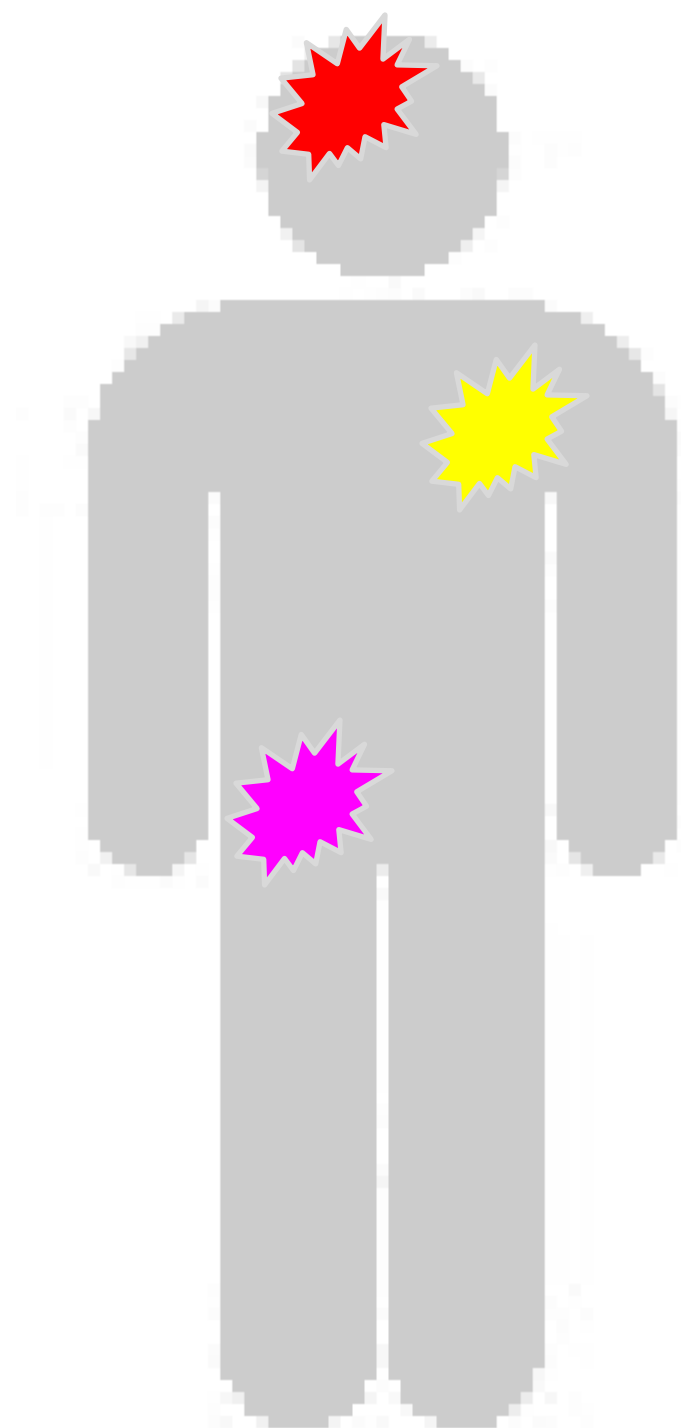

eine typische

Kombination von Zeichen

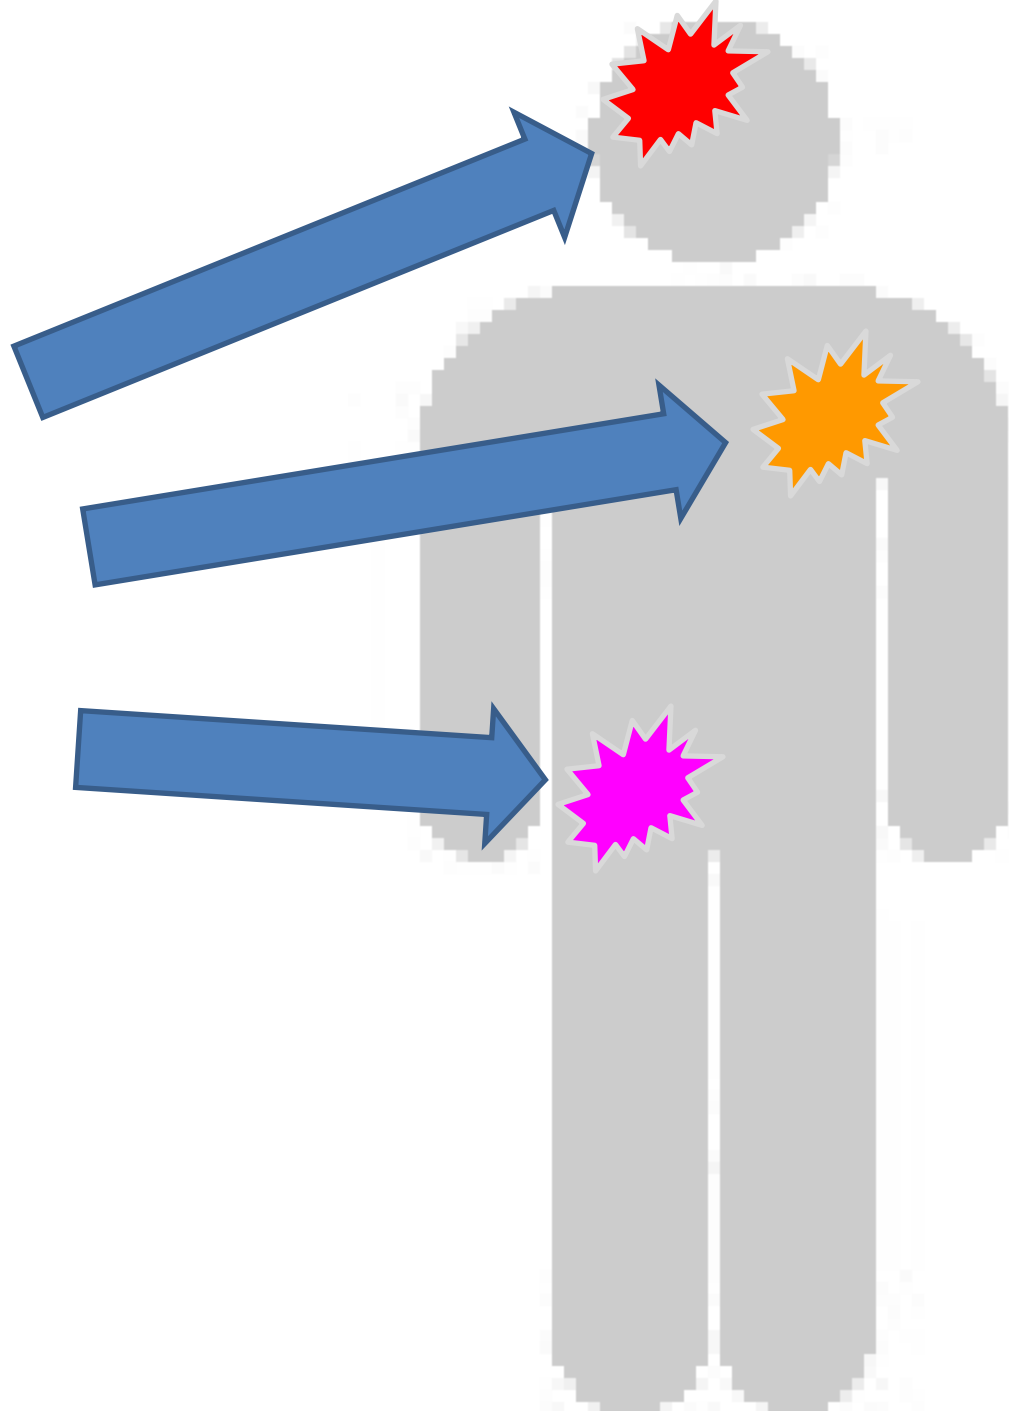

denen eine Bedeutung

gegeben wird.

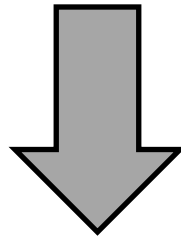

?

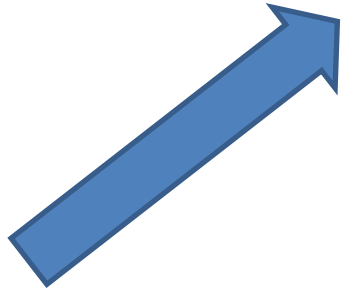

Ursache → Wirkung

Kausalkette !

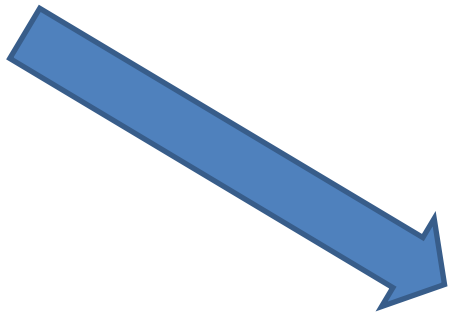

Streptococcus

Halsschmerzen

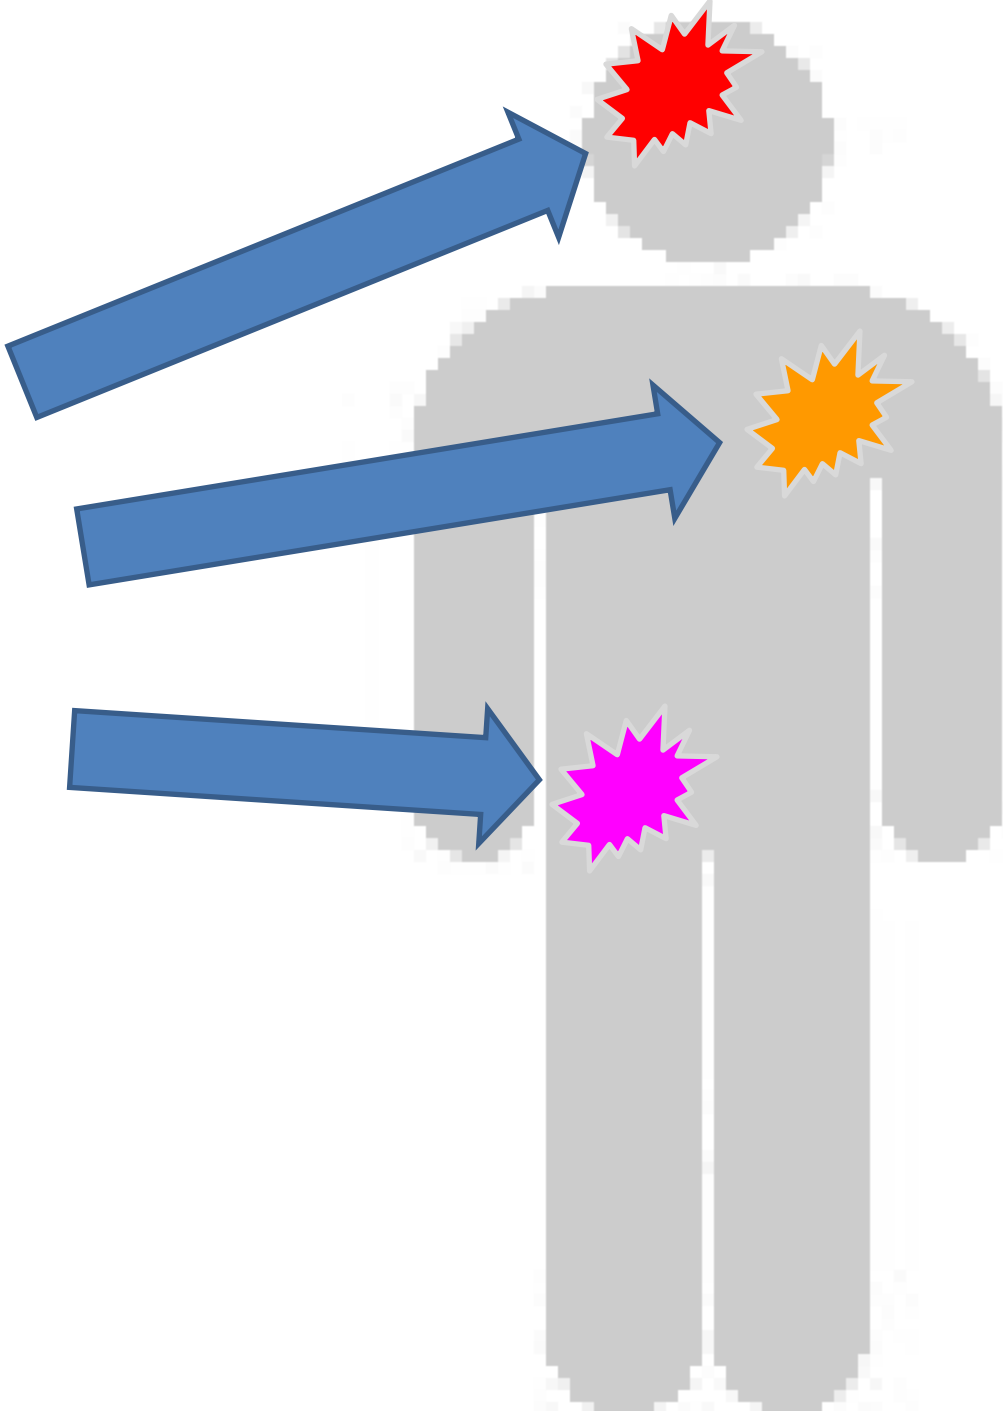

Halsenge

Eitrige Beläge

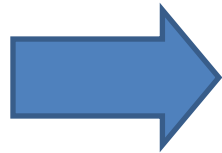

Bazillus !

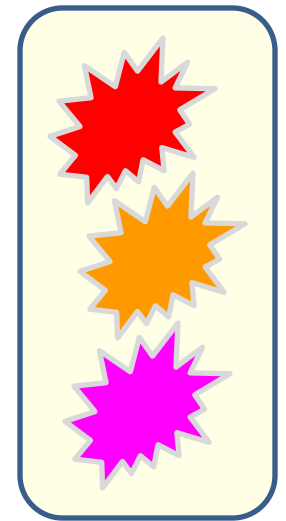

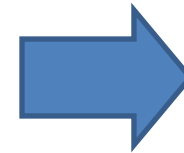

**Ursache
bekämpfen !**

Kausale Therapie!

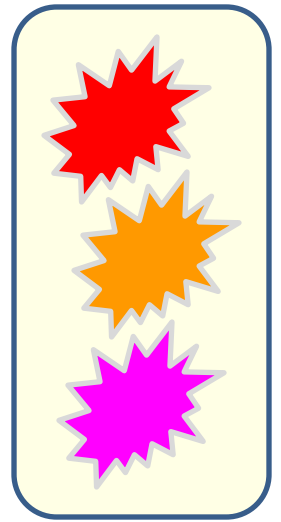

Bazillus

Penicillin!

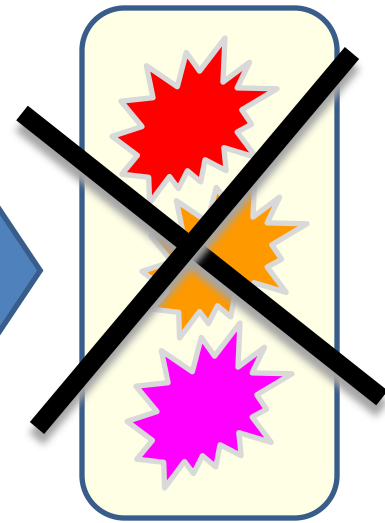

Bazillus

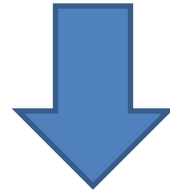

Penicillin!

~~**Bazillus**~~

Diagnose

Angina tonsillaris

Ursache bekannt !

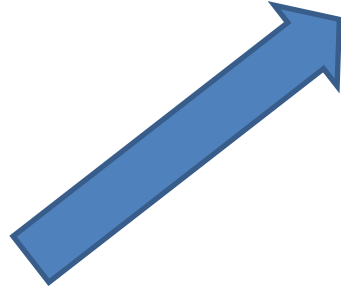

Kausale Therapie!

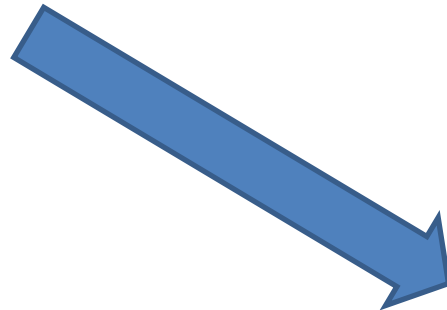

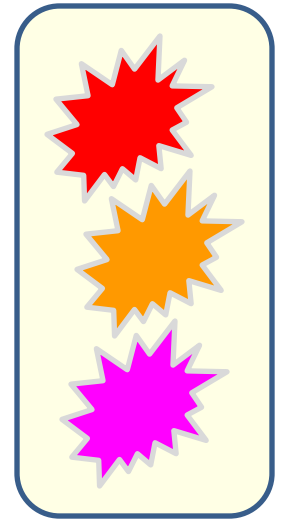

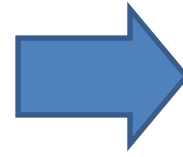

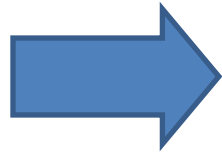

Gelenkschmerz

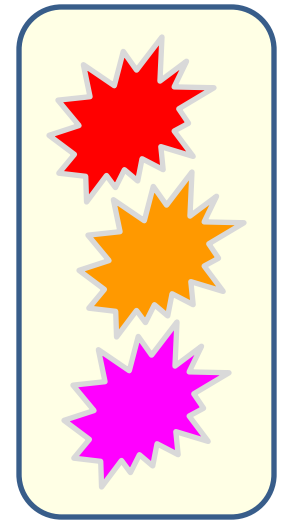

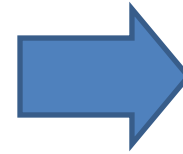

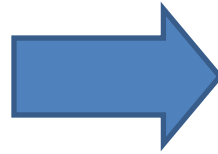

Rötung

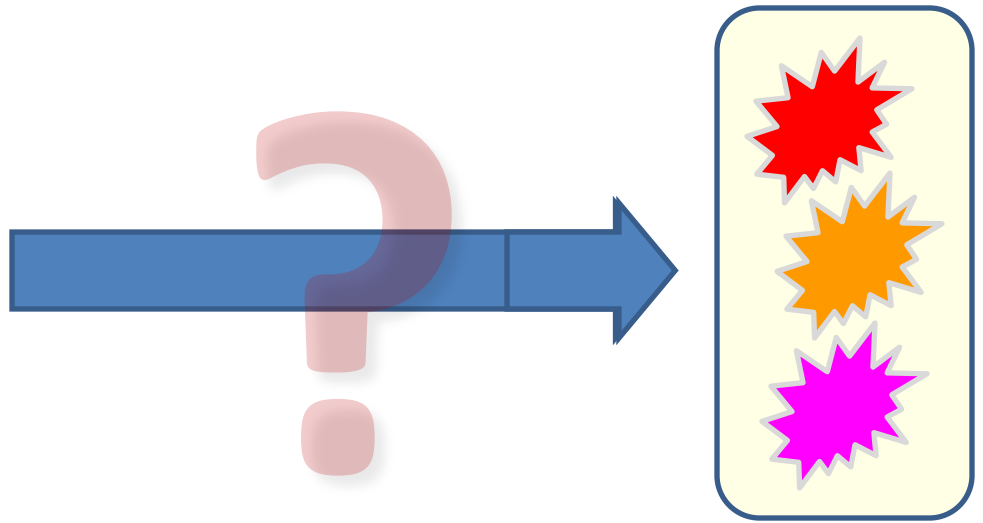

Schwellung

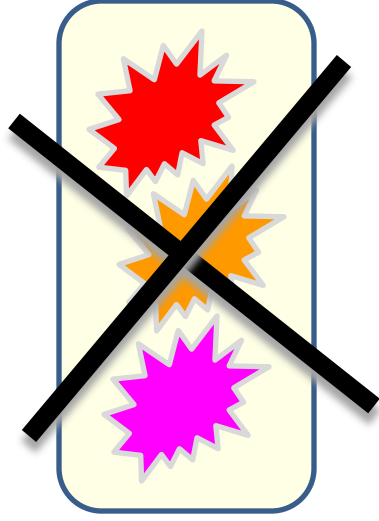

**Entzündungs-
Hemmer**

**Entzündungs-
Hemmer**

Entzündungs Hemmer

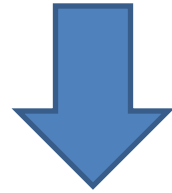

**Symptome
bekämpfen !**

**Symptomatische
Therapie!**

Diagnose

Rheuma

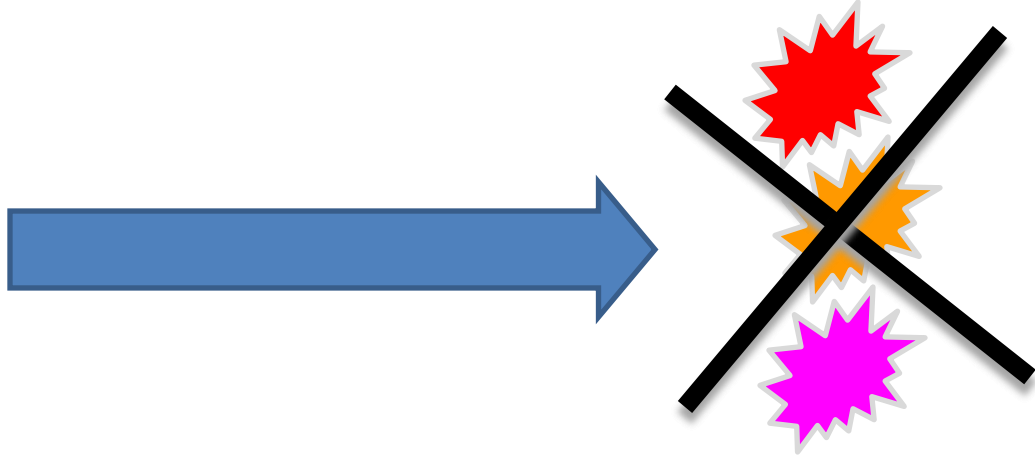

**Ursache unbekannt oder
nicht zu bekämpfen**

Symptomatische

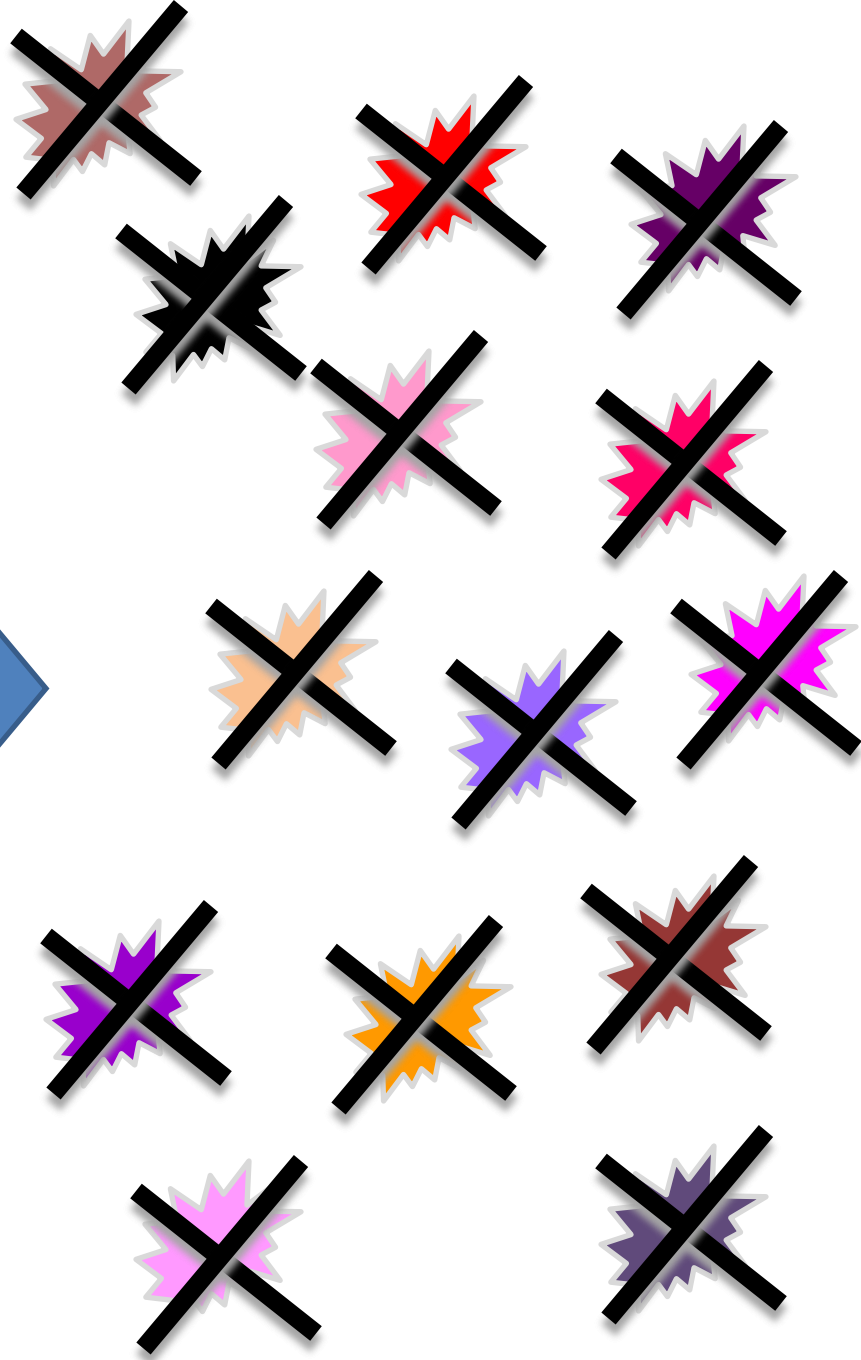

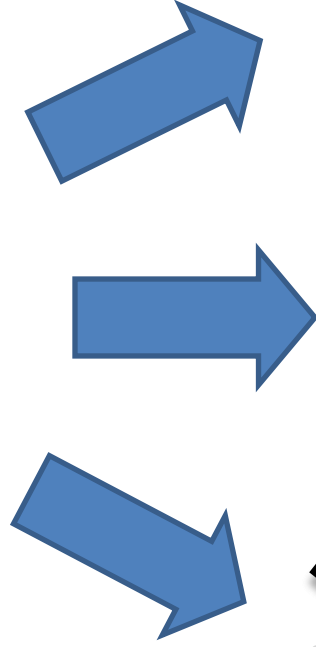

Therapie!

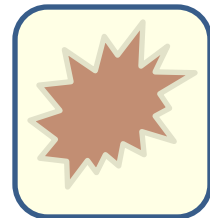

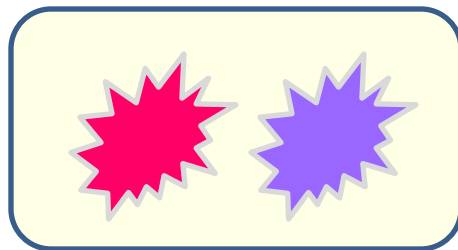

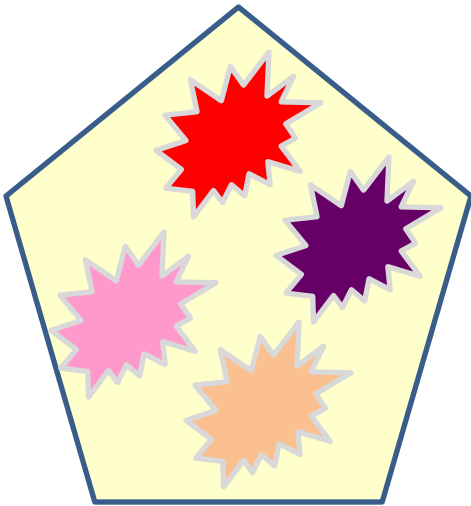

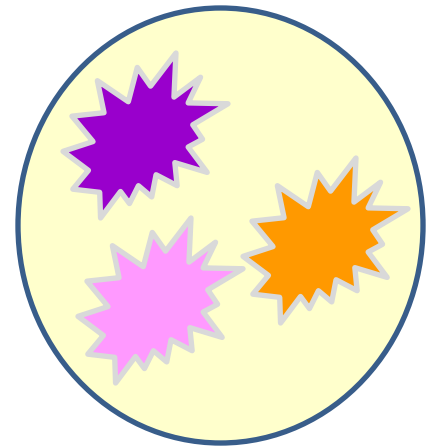

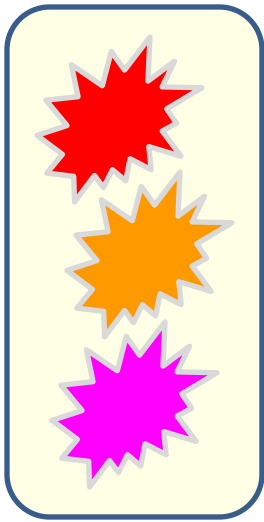

Entzündungs Hemmer

Entzündungs

Hemmer

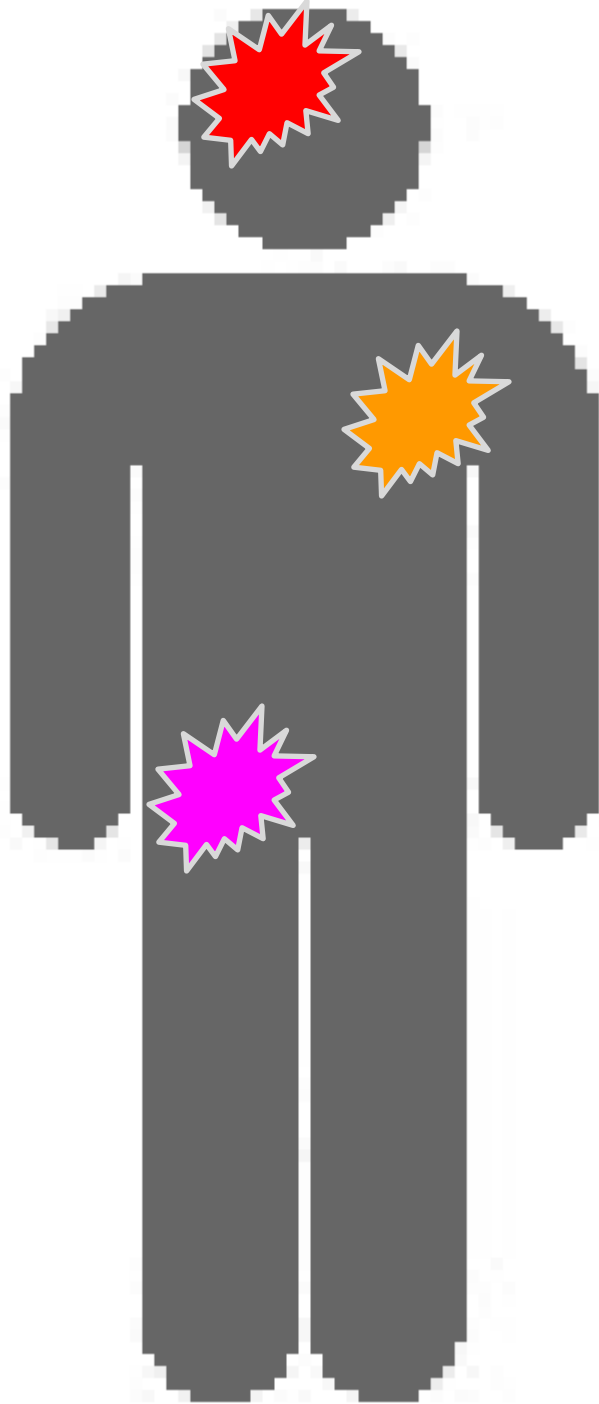

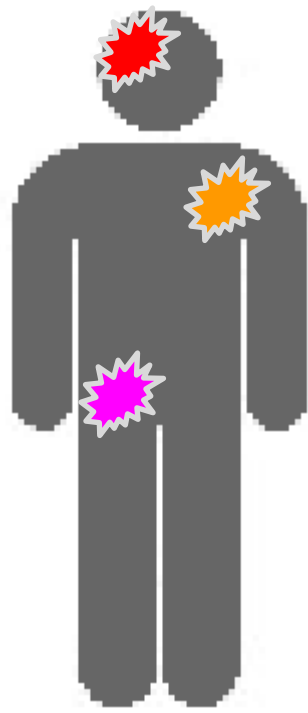

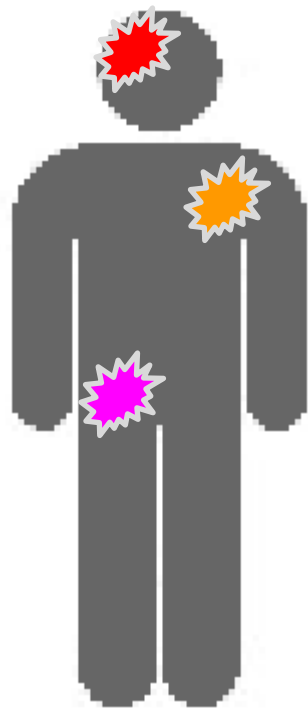

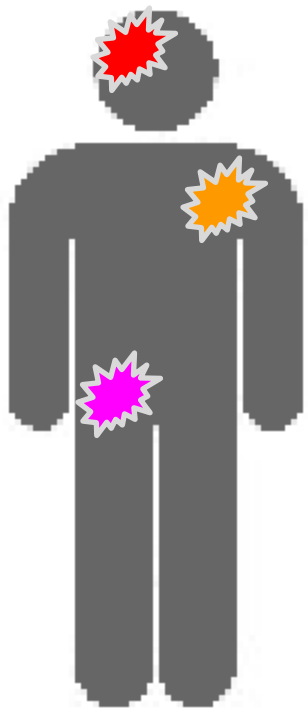

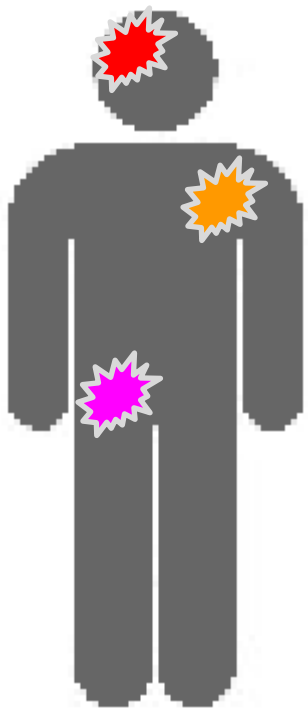

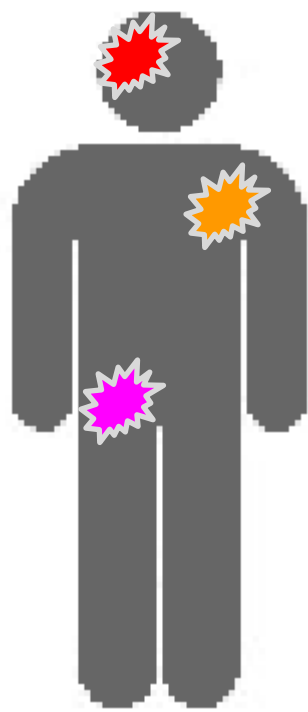

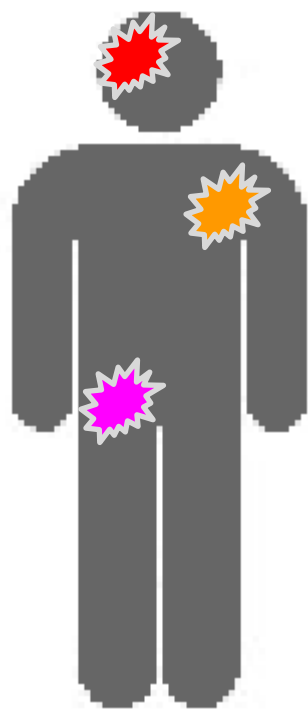

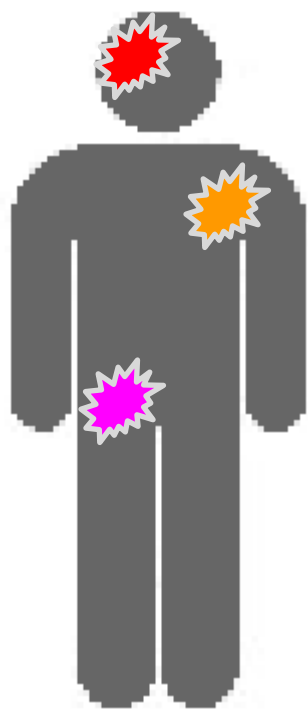

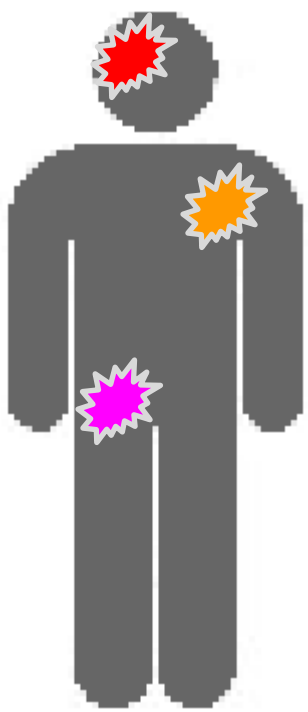

Eine

symptomatische,

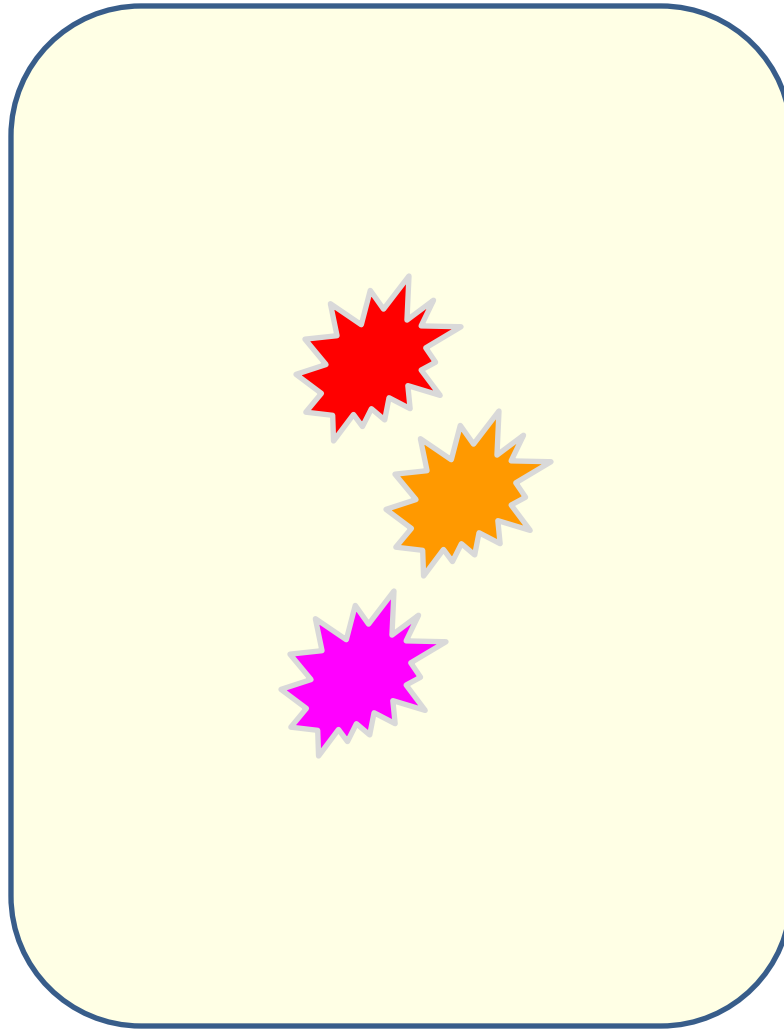

unspezifische

Therapie!

Ein

störungsorientiertes

Konzept behandelt

Störungen!

Störungsorientiertes

Konzept

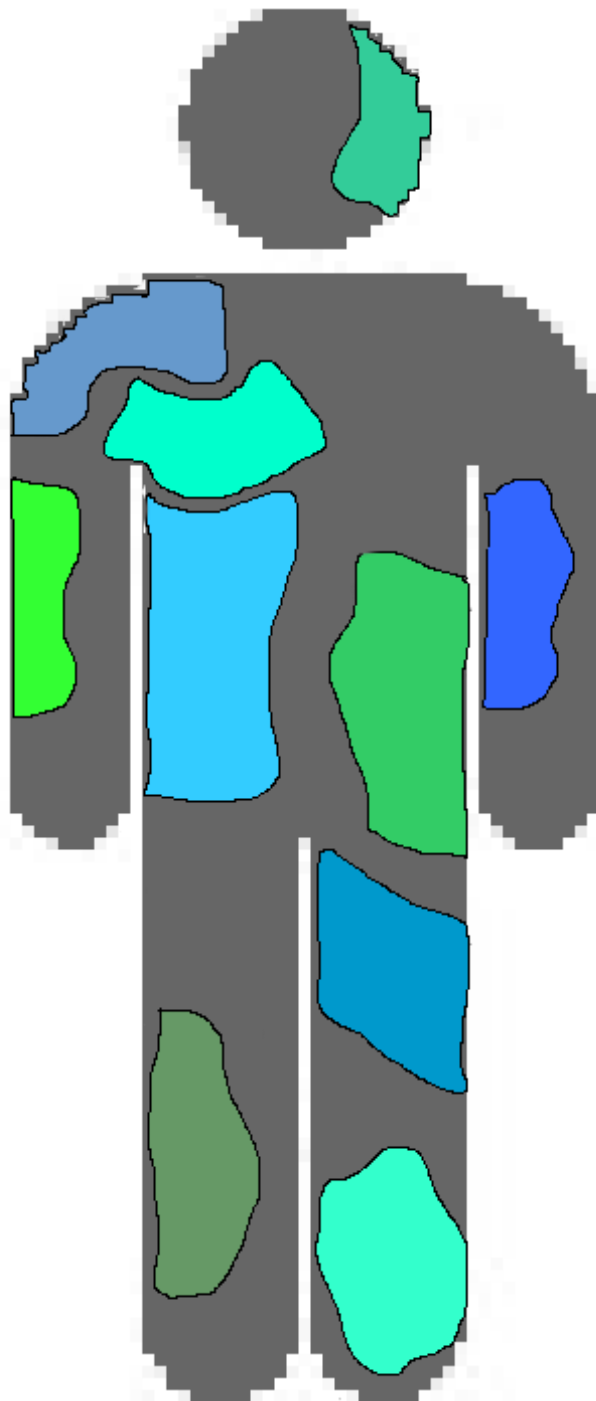

oder

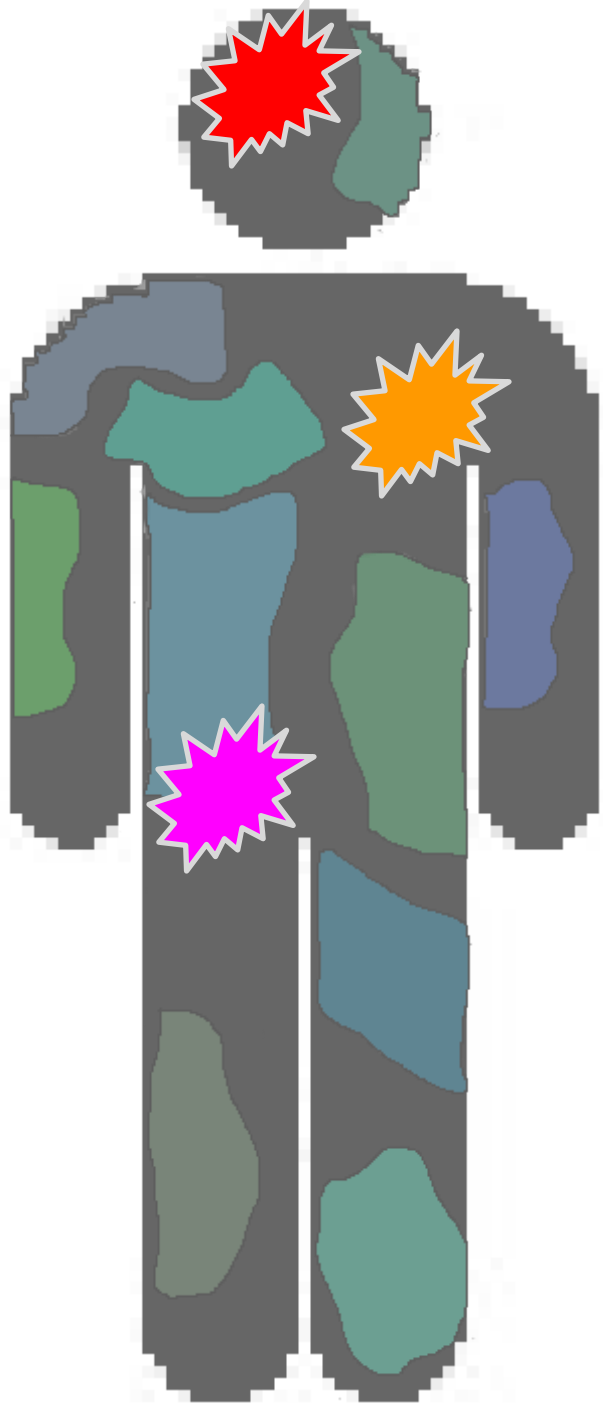

Pathogenetisches

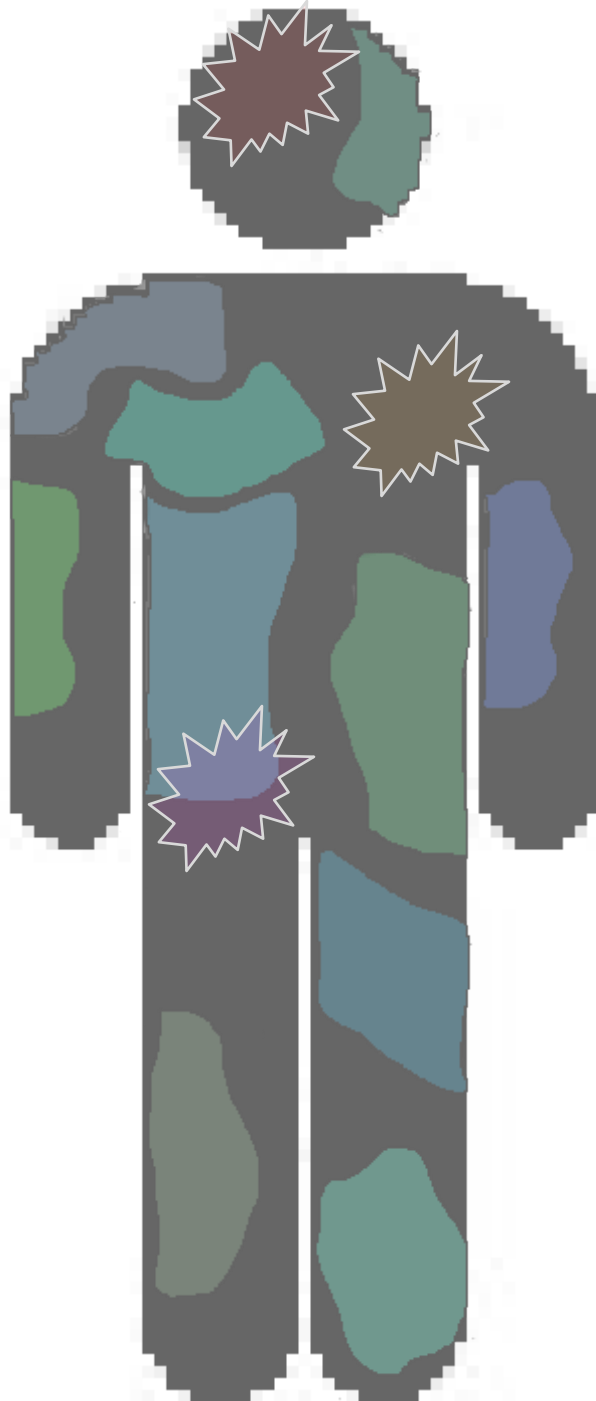

Konzept

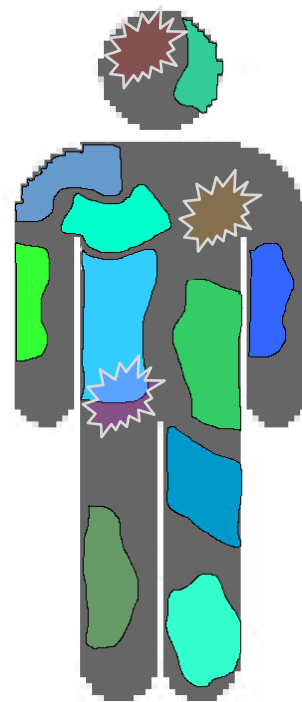

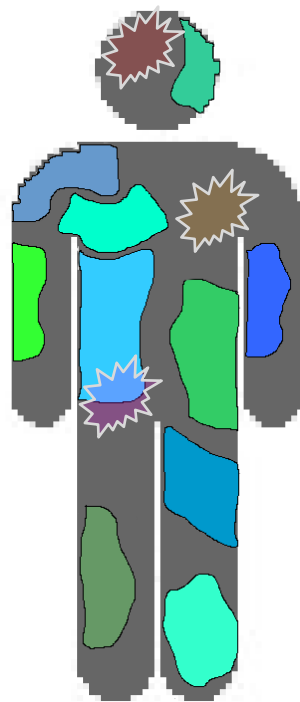

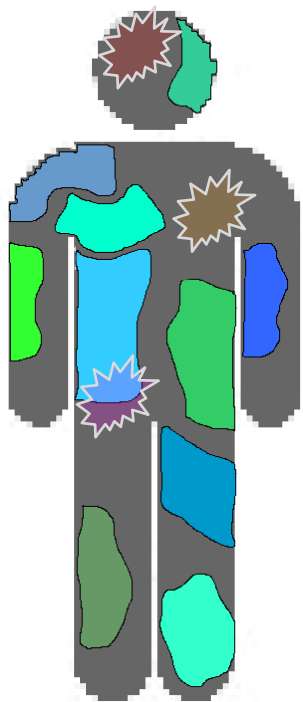

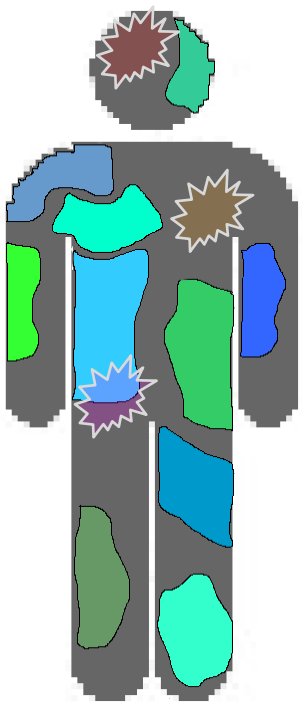

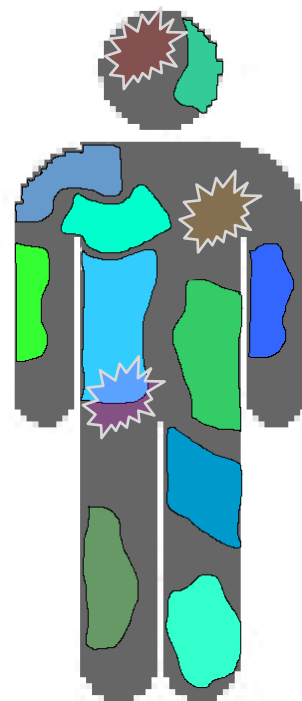

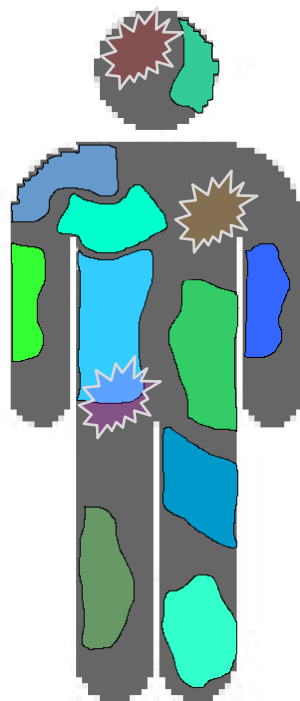

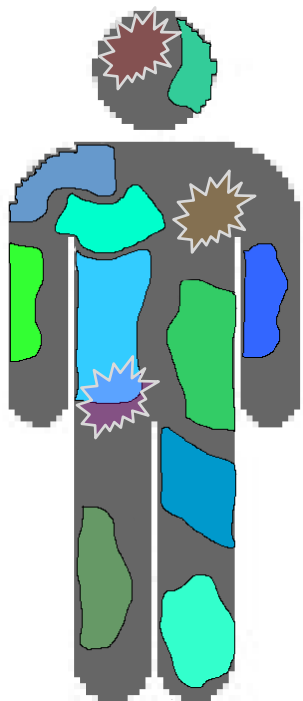

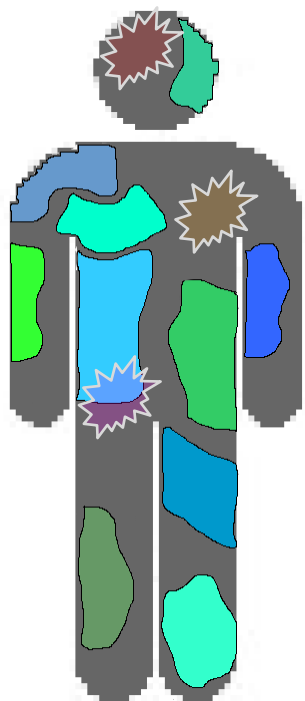

**Wenn man nun aber
etwas genauer
hinsieht ...**

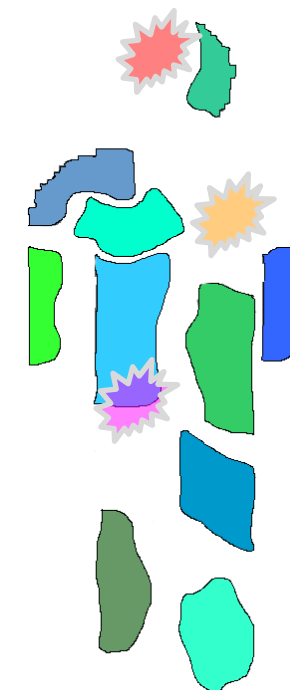

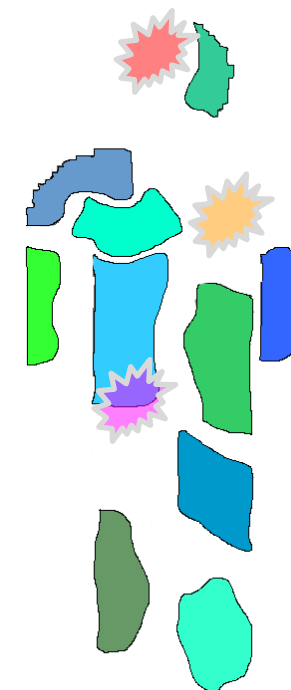

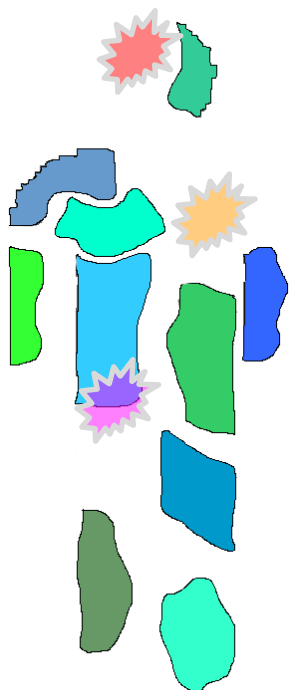

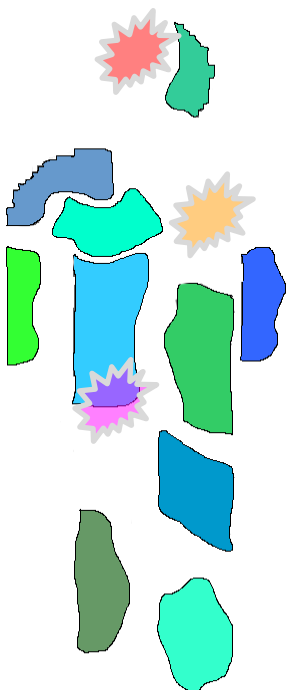

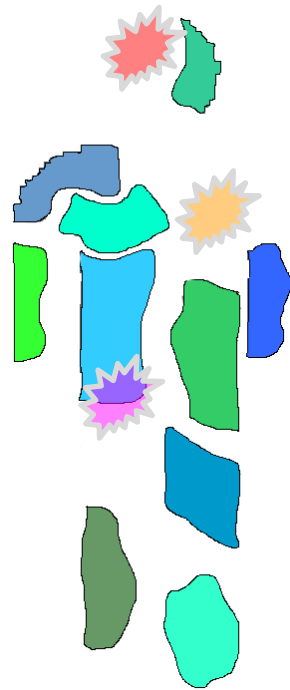

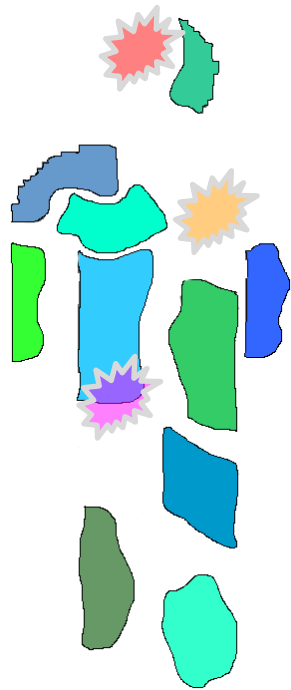

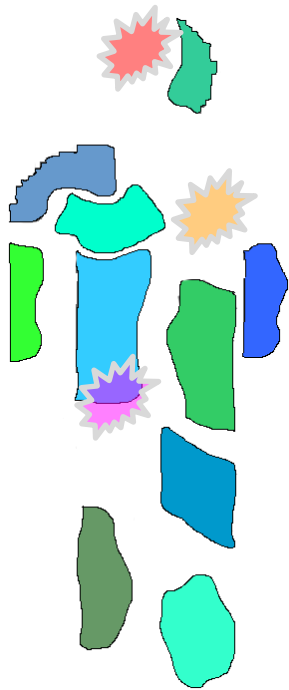

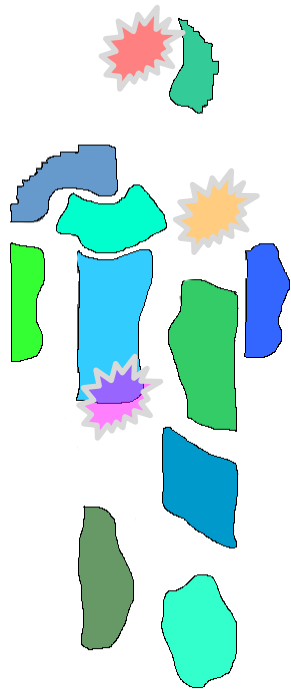

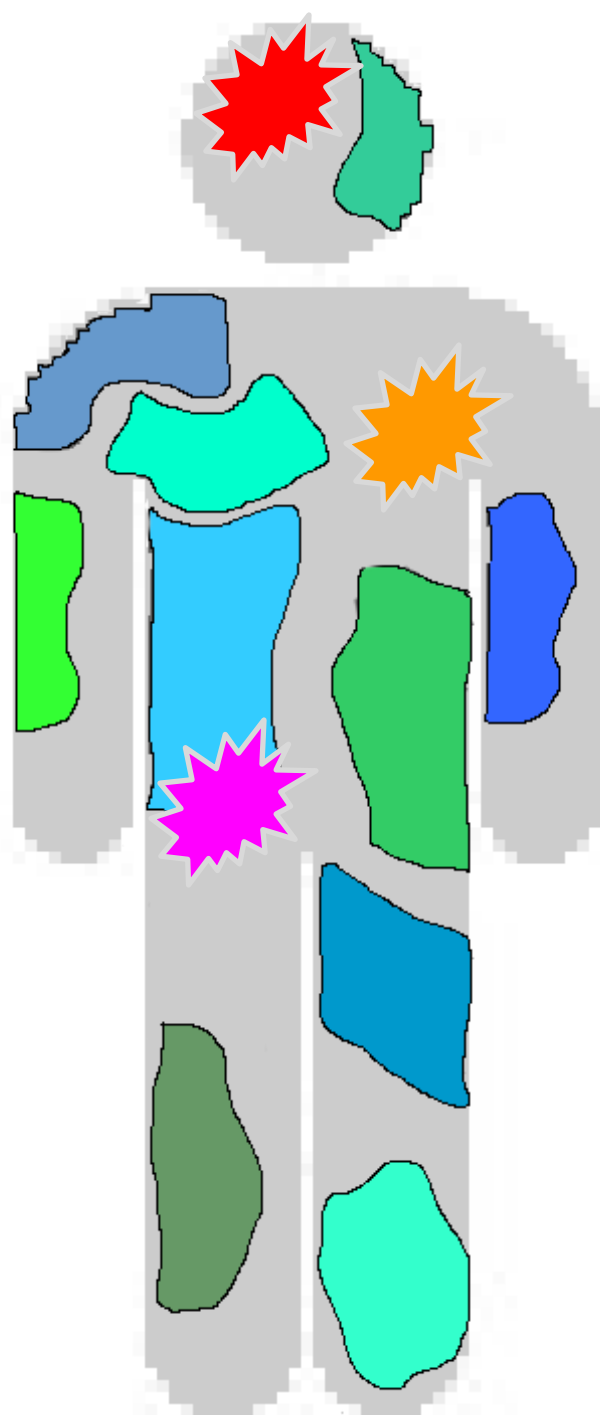

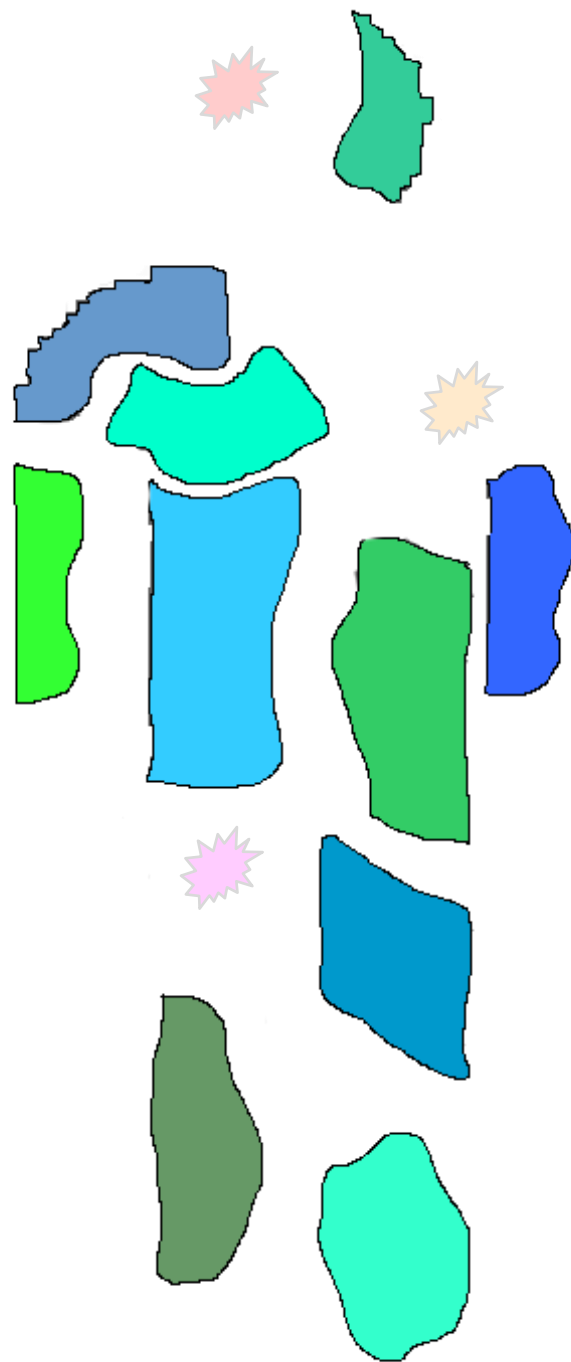

Ein

ressourcenorientiertes

Konzept

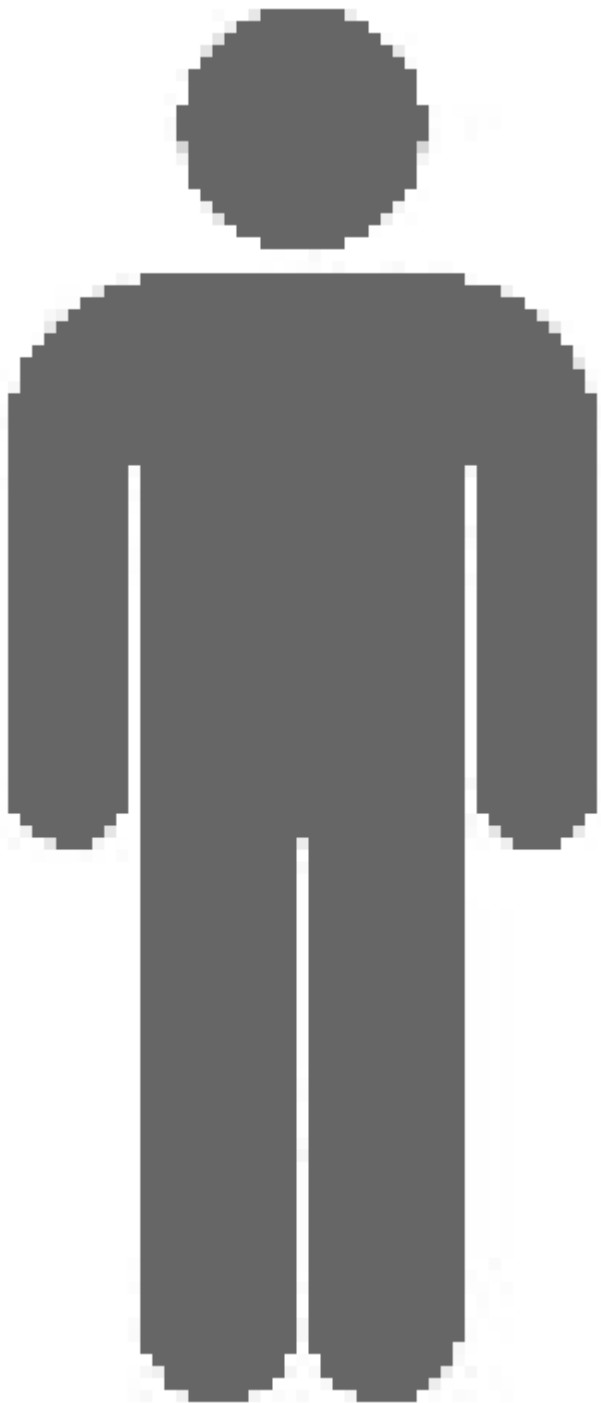

orientiert sich an

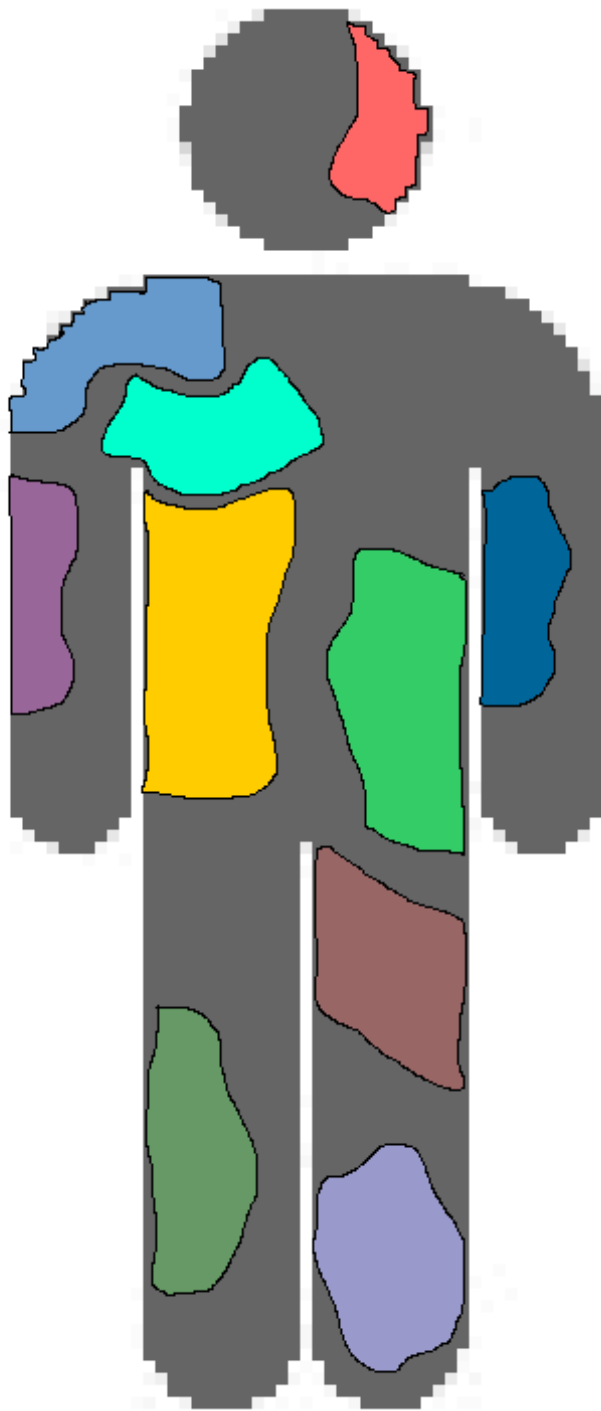

Ressourcen/Potentialen!

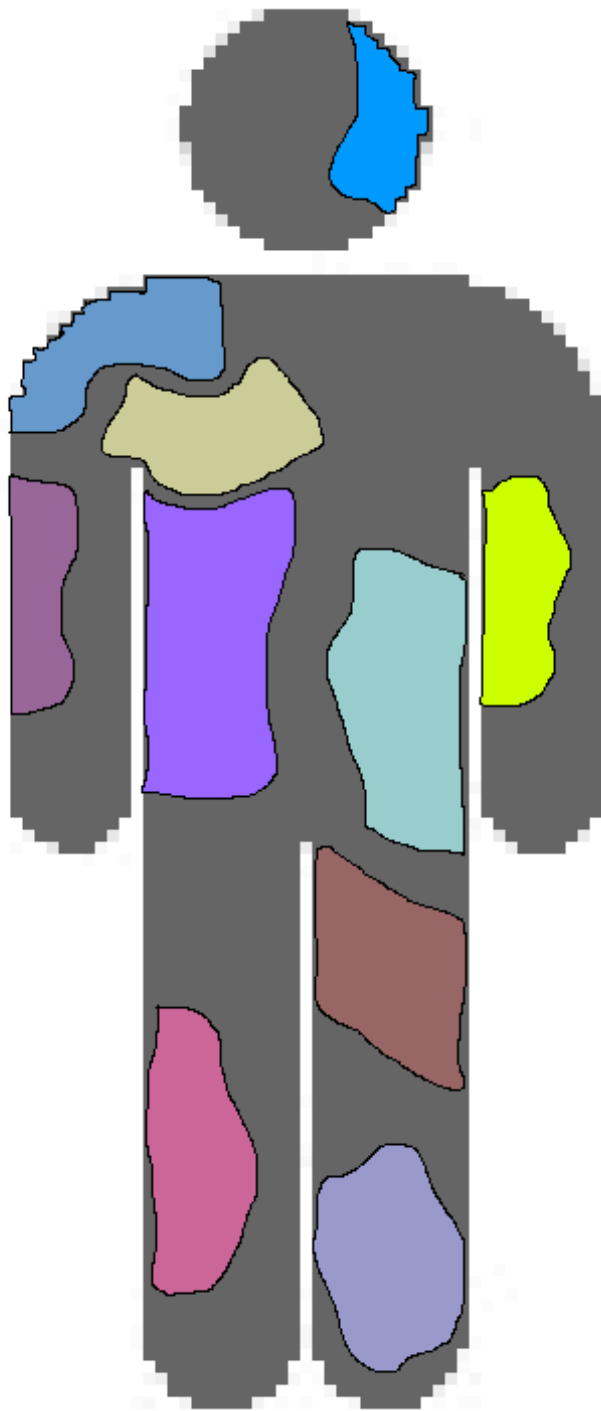

**Ressourcen/Potential-
orientiertes Konzept**

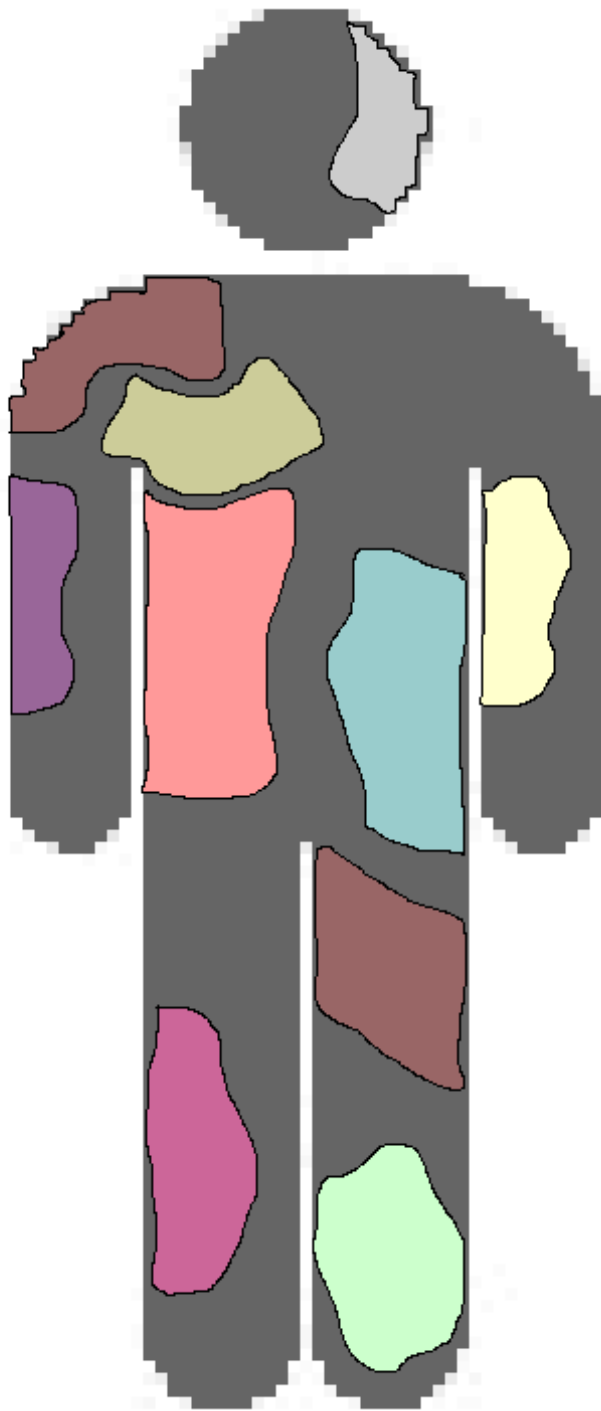

oder

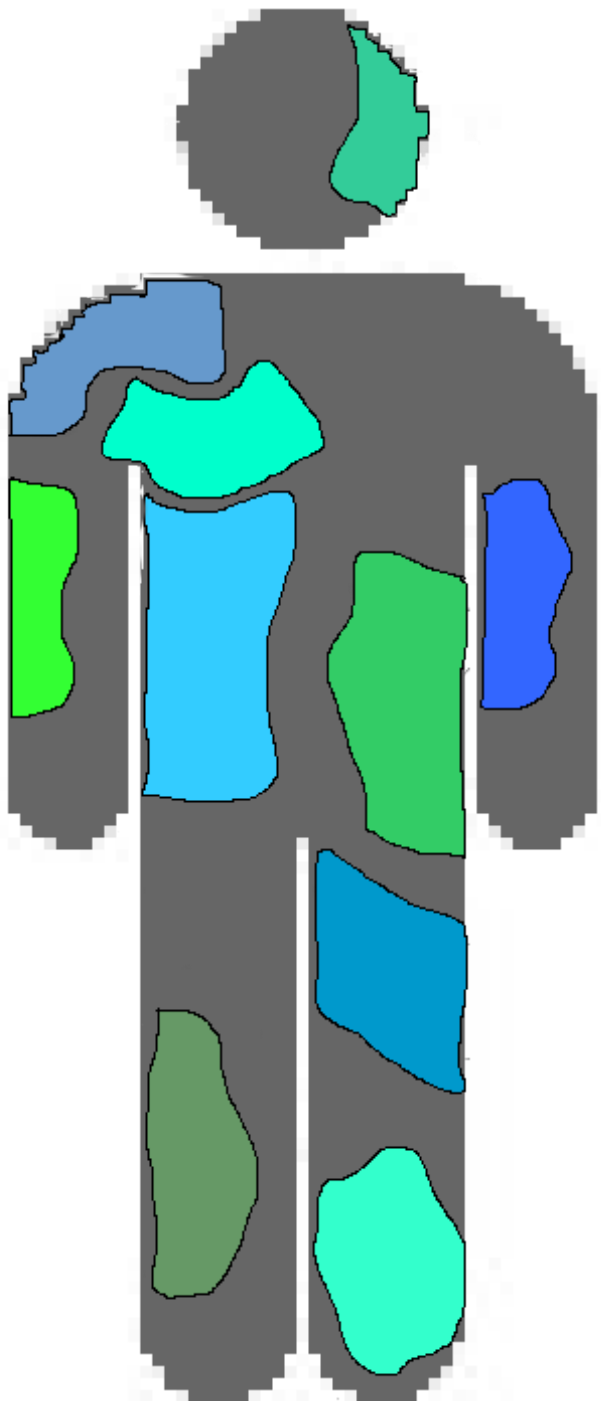

**Salutogenetisches
Konzept**

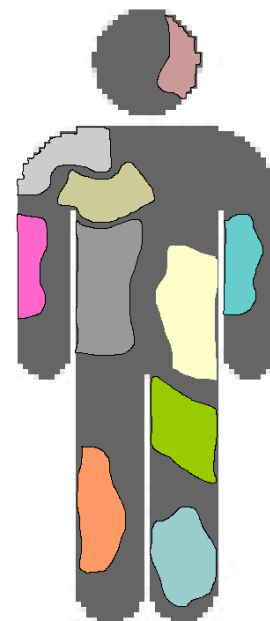

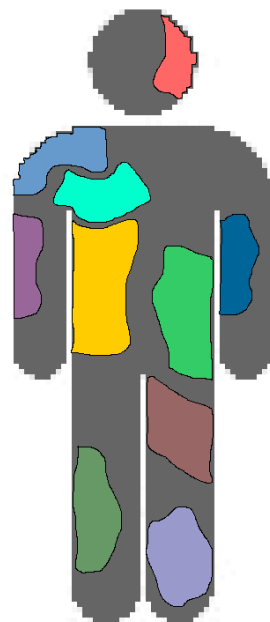

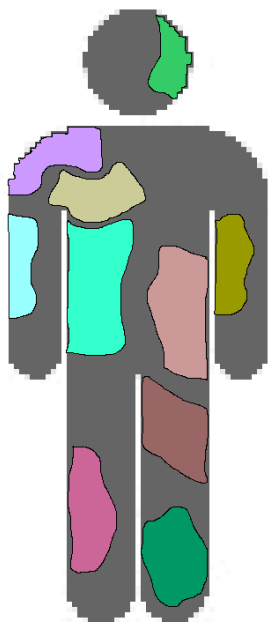

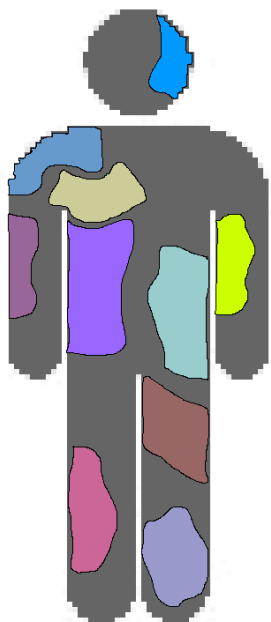

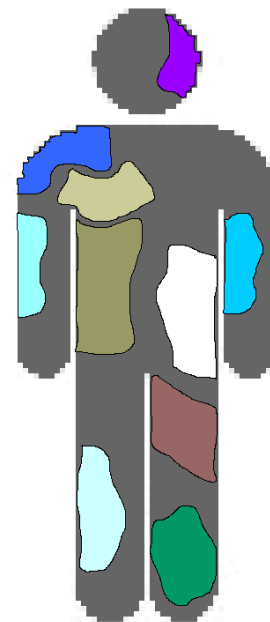

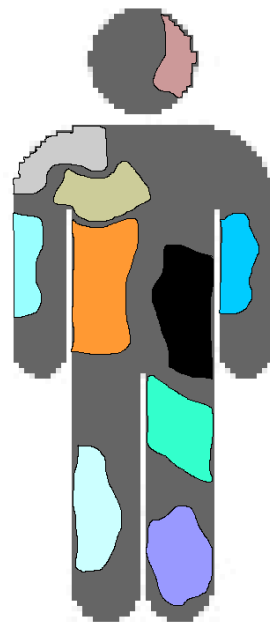

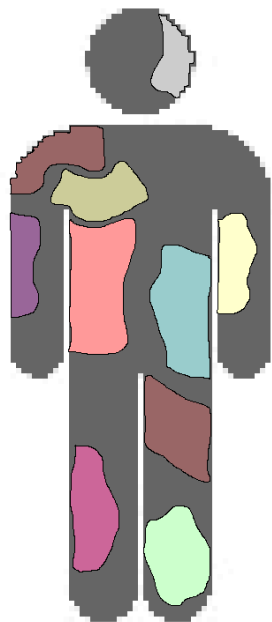

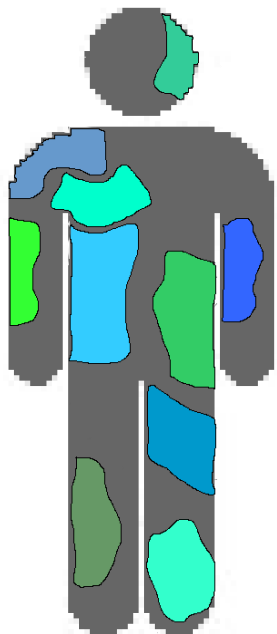

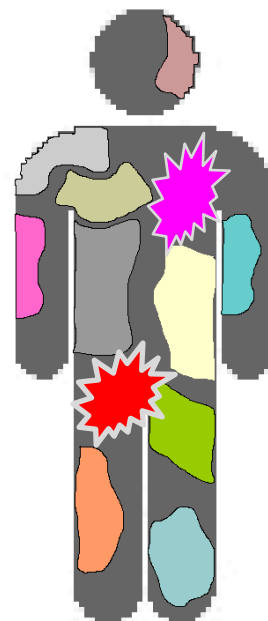

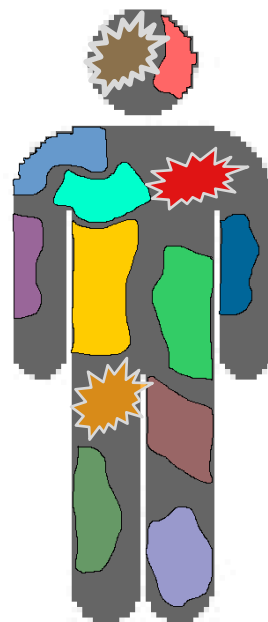

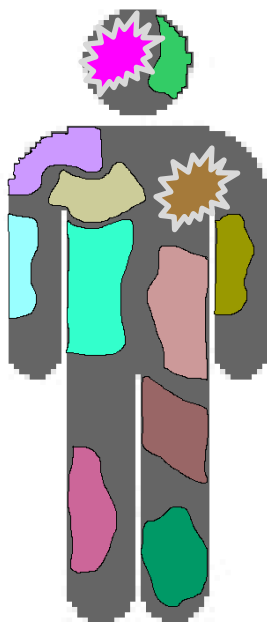

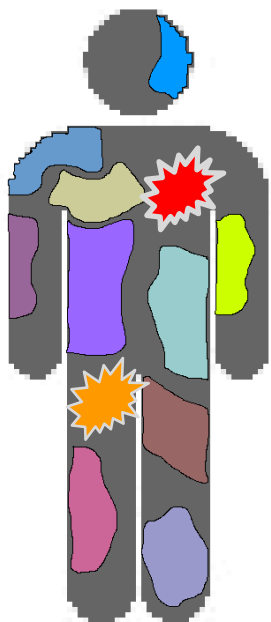

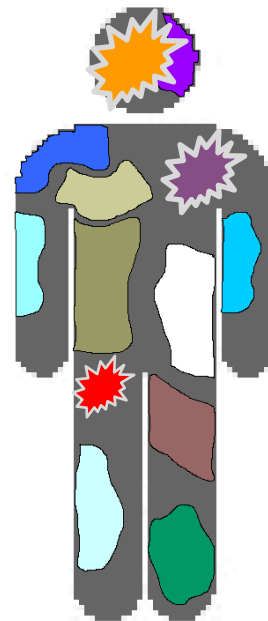

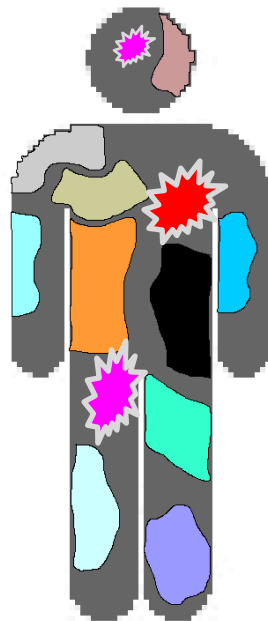

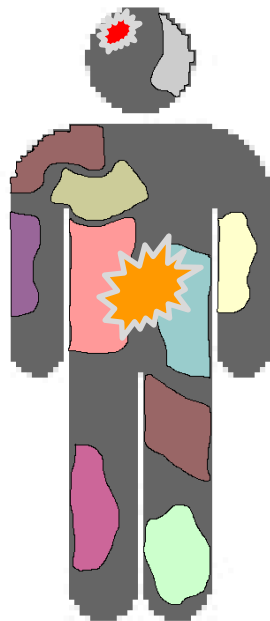

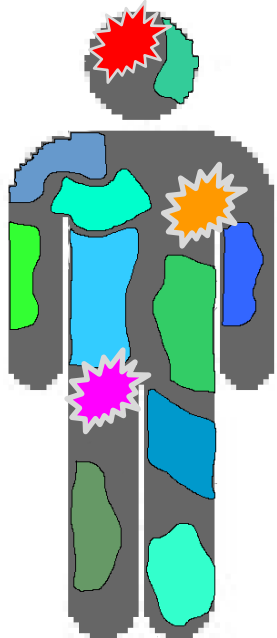

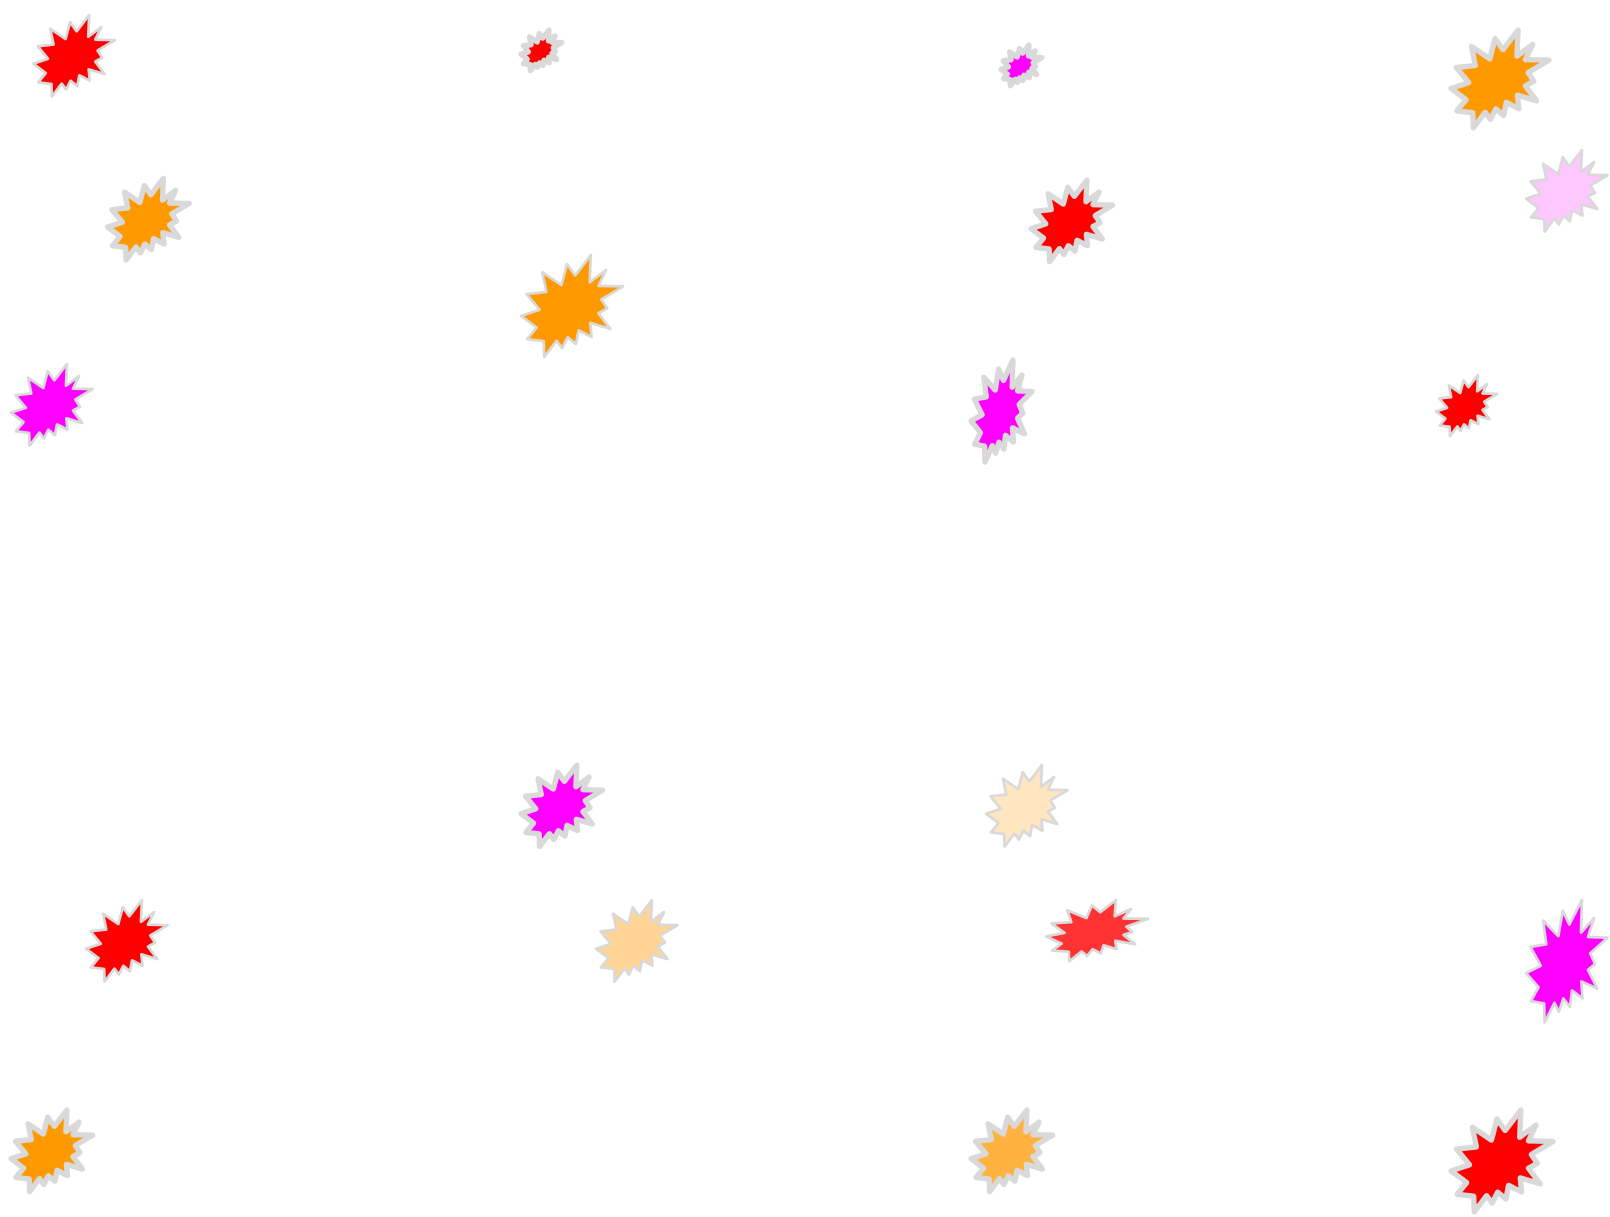

Wenn Menschen so
verschieden sind ...

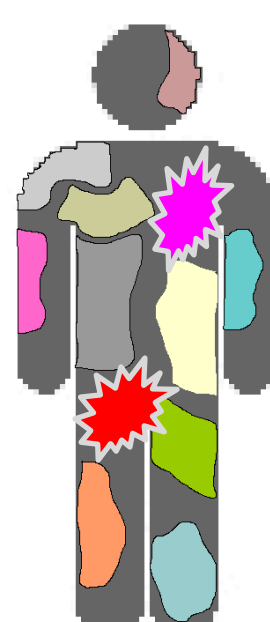

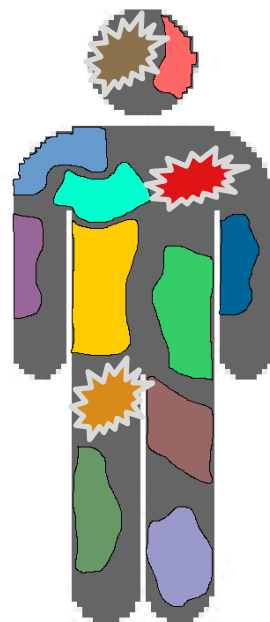

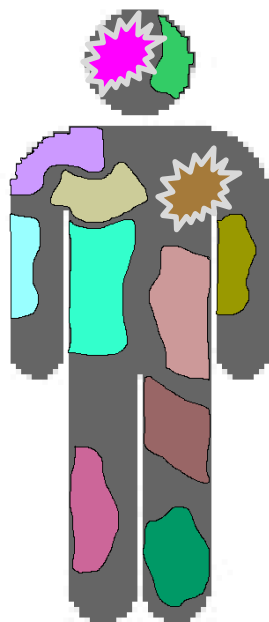

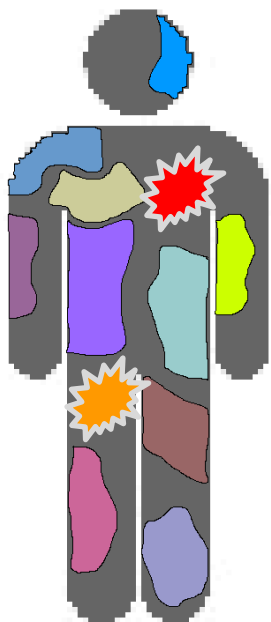

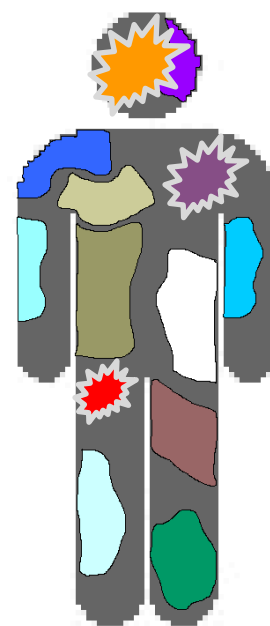

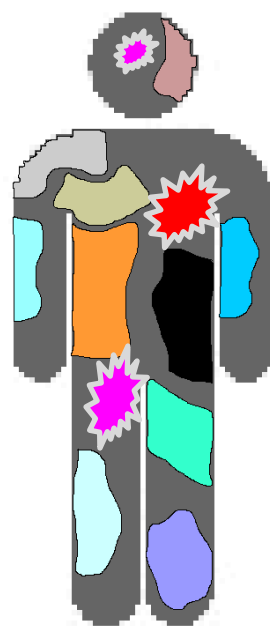

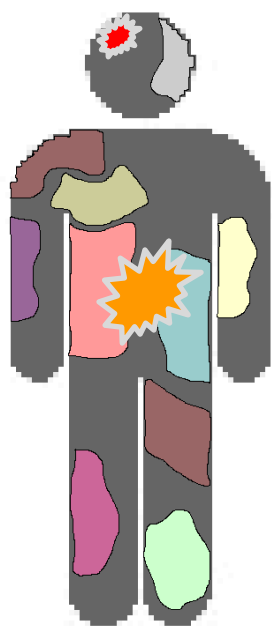

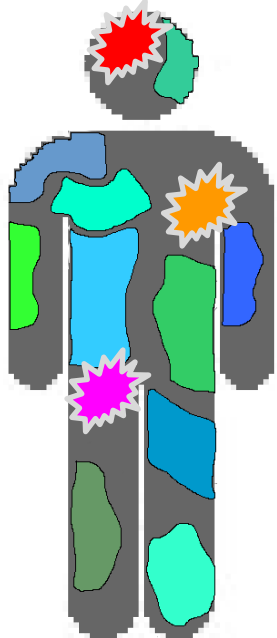

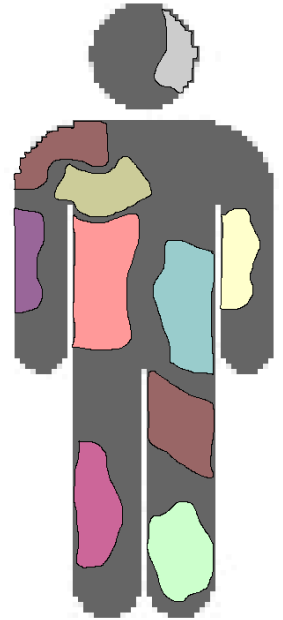

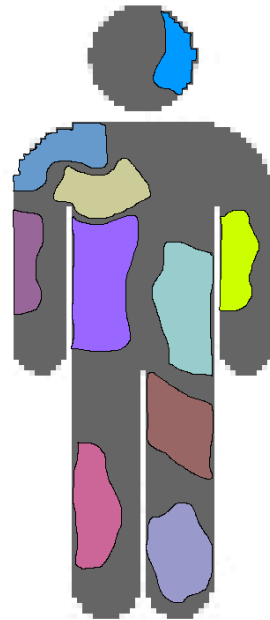

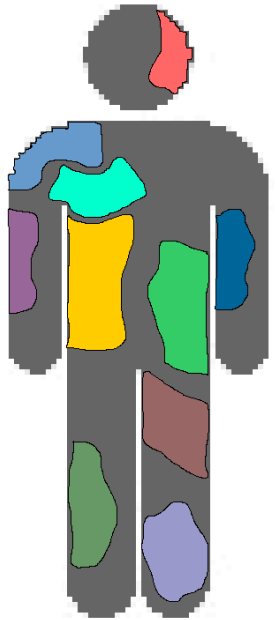

... wenn selbst ihre

Störungen doch so

verschieden sind ...

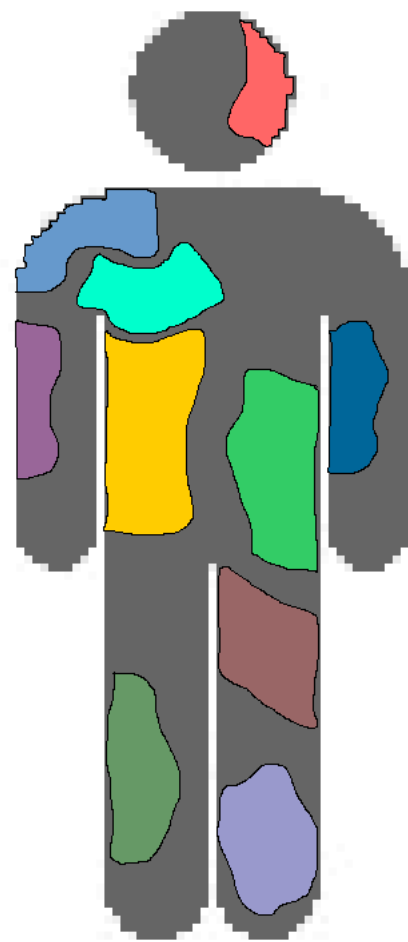

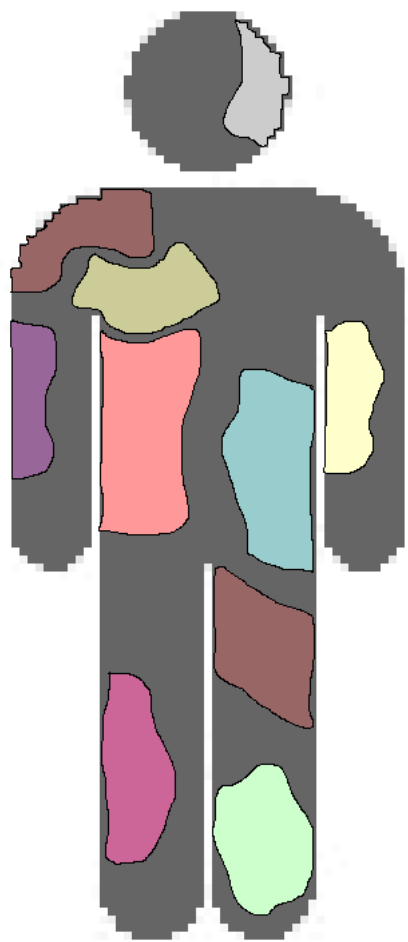

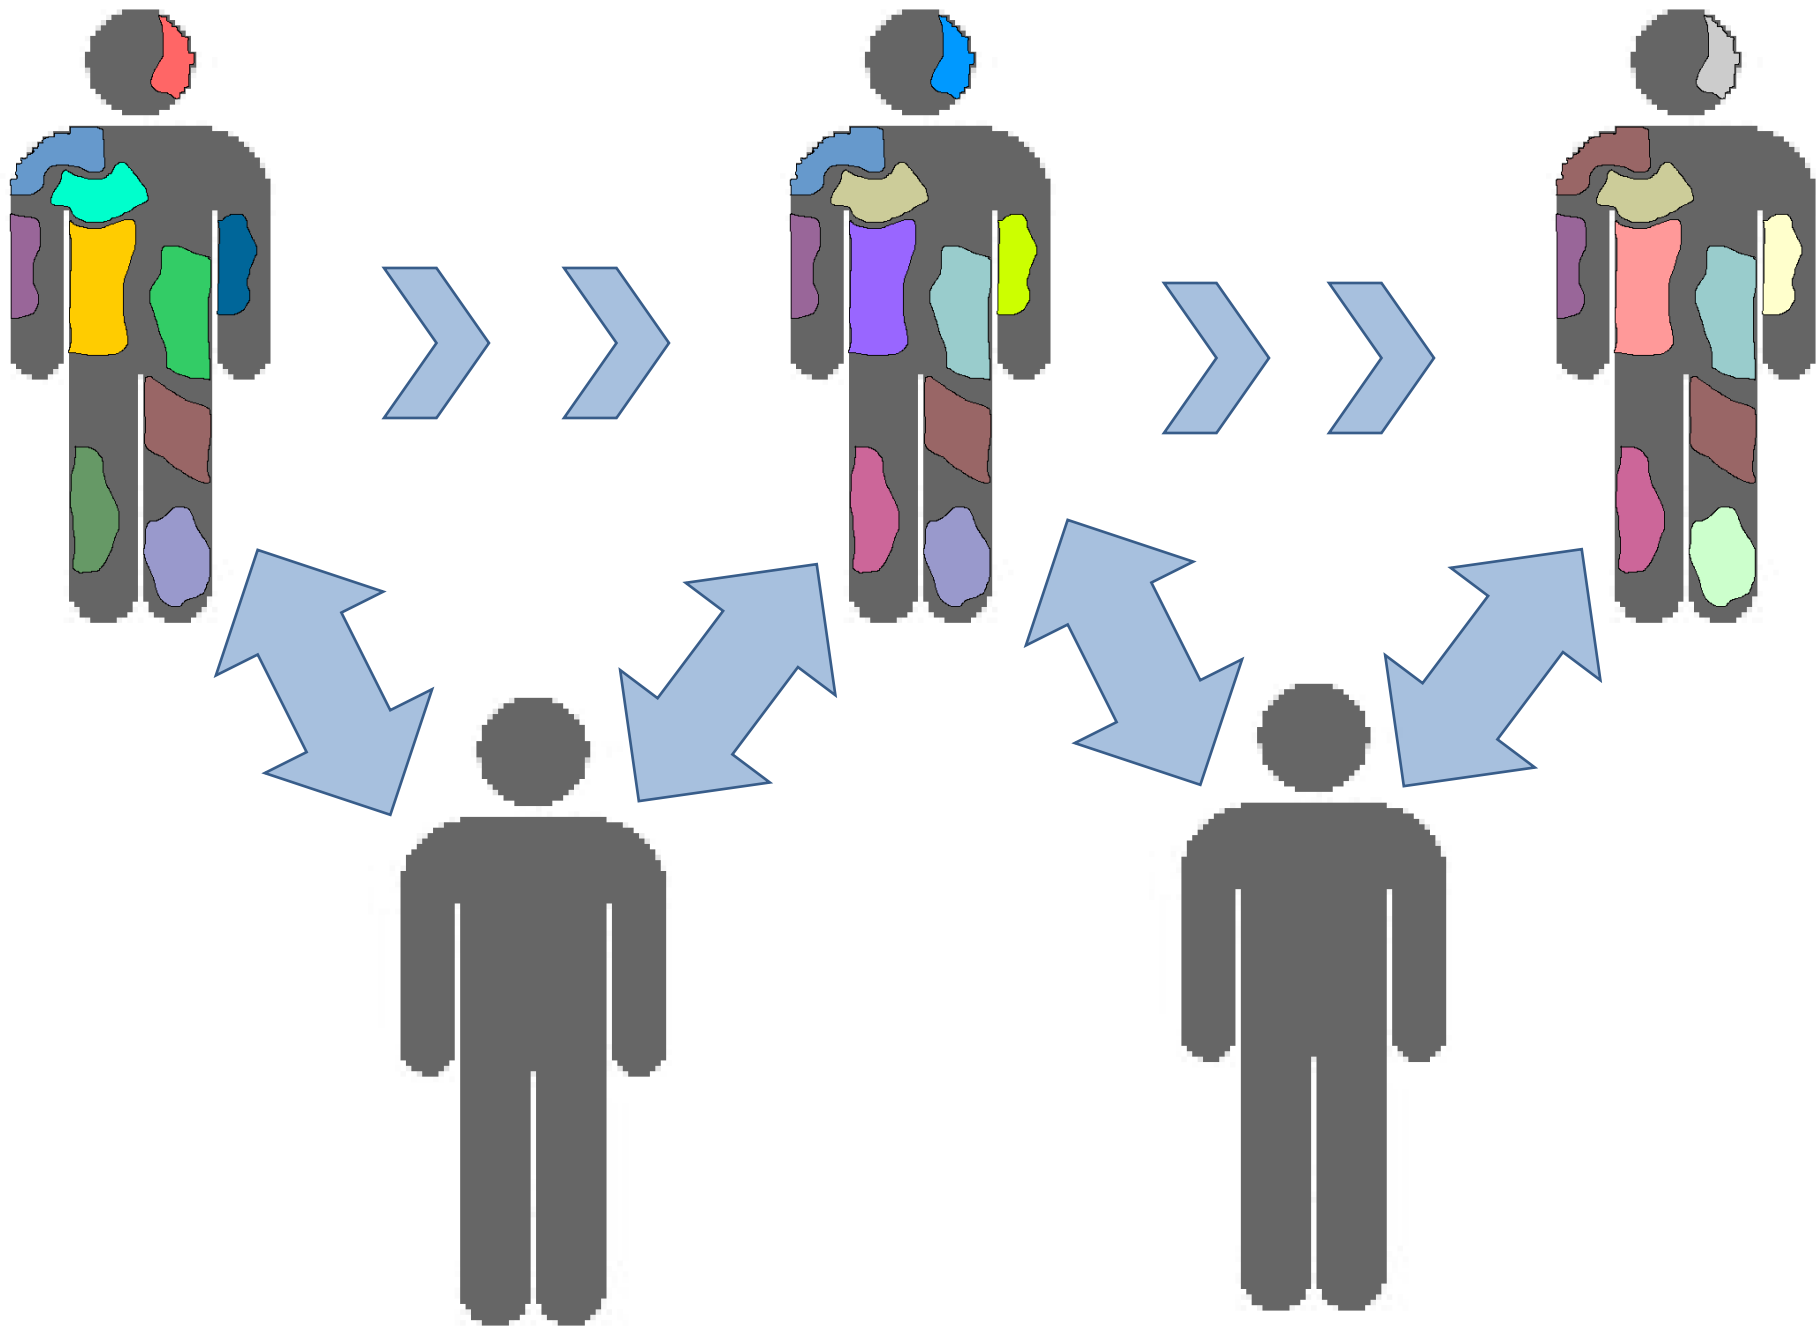

**... wenn Potentiale
mindestens genauso
wichtig sind wie das
Syndrom ...**

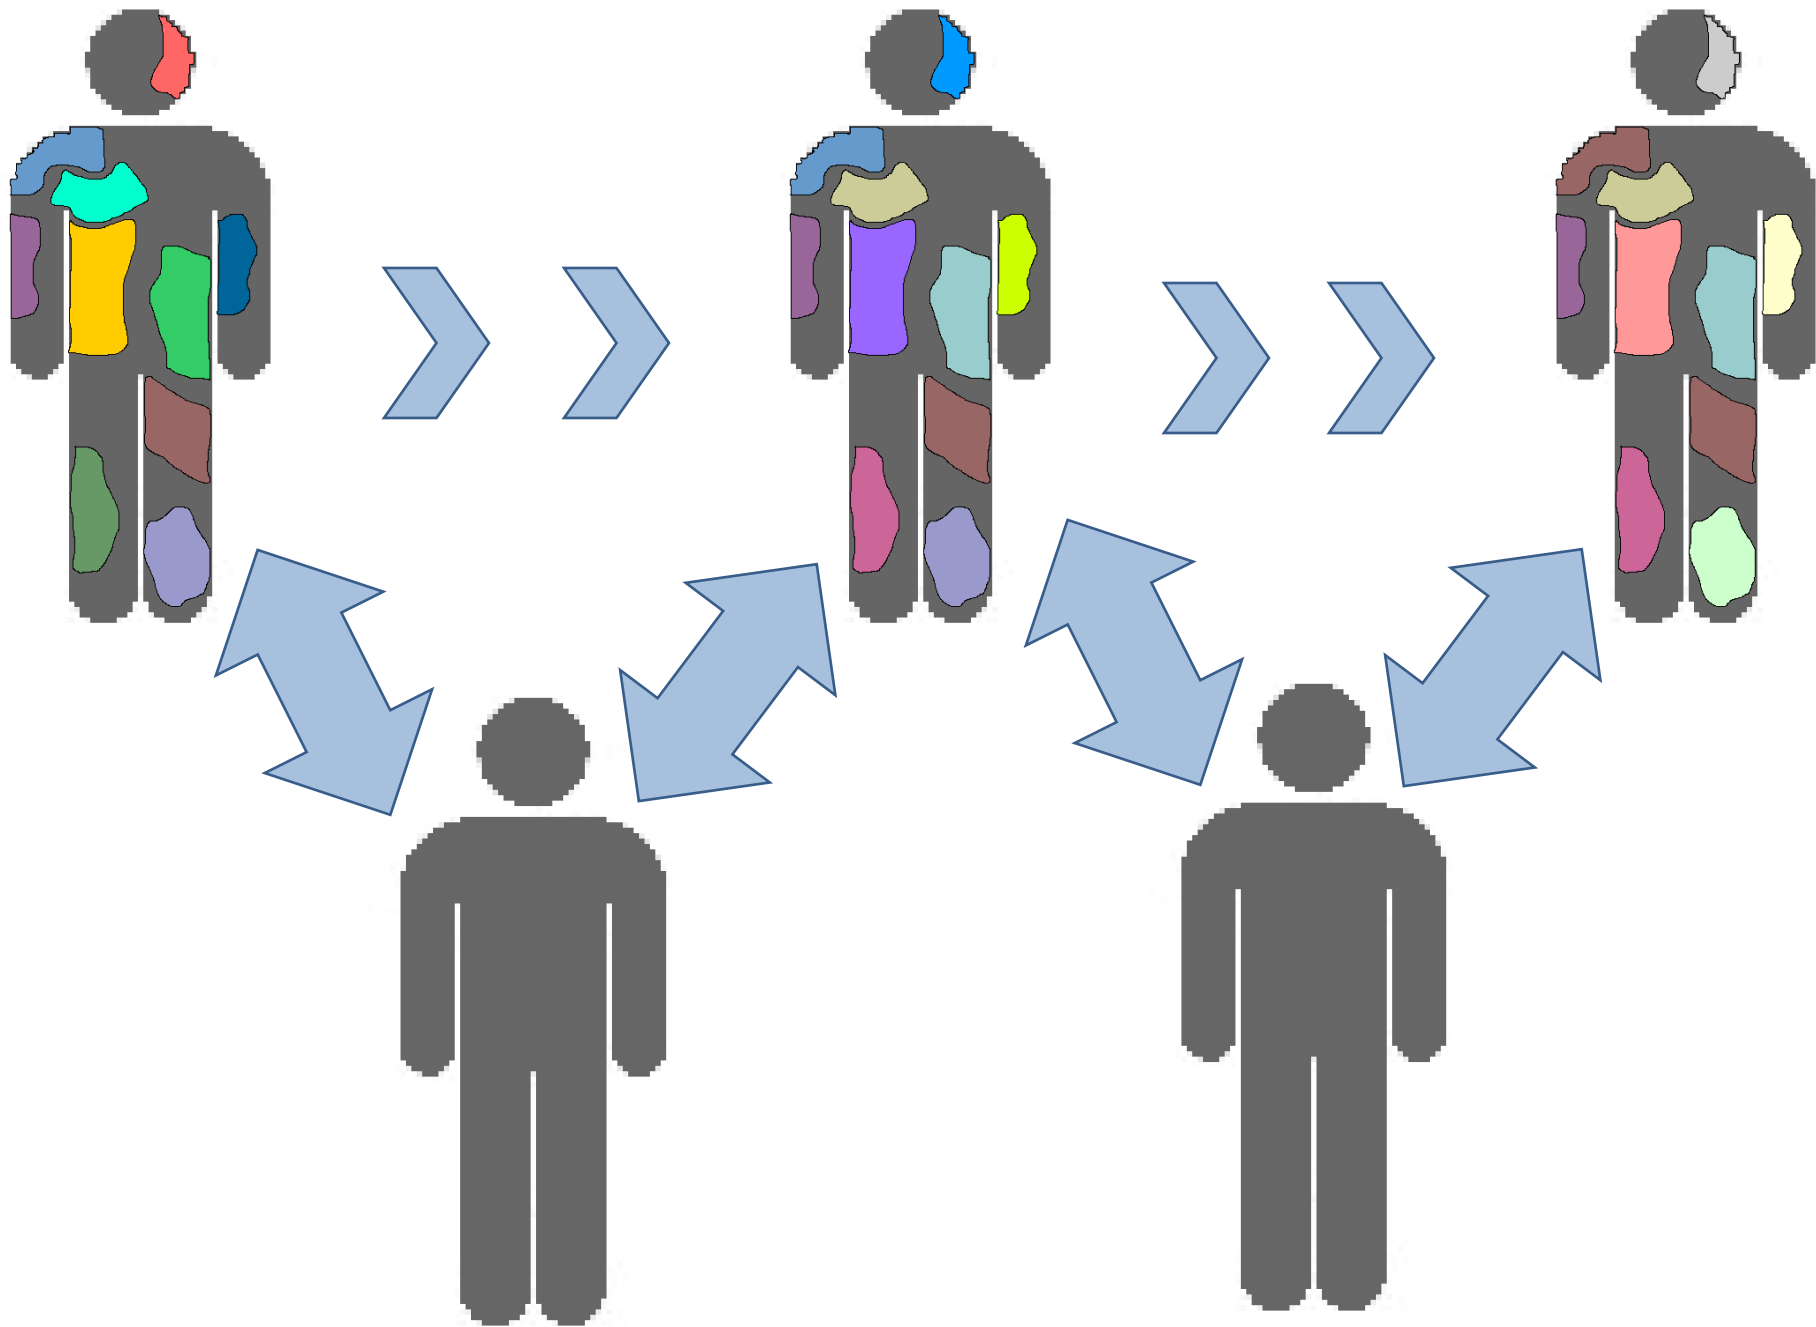

**... wenn Menschen
sich ständig
weiterentwickeln...**

**... wenn wir uns
in und durch
Beziehungen
entwickeln...**

**... ist dann
störungsspezifisch
spezifisch genug ?**

**Sollte dann nicht
auch eine Diagnostik
möglichst:**

störungsdifferenziert,

potentialorientiert,

personspezifisch,

prozessorientiert

und

beziehungsorientiert

sein ?

Also:

personzentriert ?

„Wenn ich in mir die beschriebenen
Einstellungen einnehme, und wenn
der andere diese erfahren kann,
werden sich Veränderung und
konstruktive
Persönlichkeitsentwicklung
in allen Fällen ereignen - ...“

Carl R. Rogers

**„... und ich schreibe
„in allen Fällen“
erst nach langer und
sorgfältiger Überlegung
dazu.“**

Carl R. Rogers

Nur ein
universelles Konzept
kann
personenspezifisch
sein.

**Nur eine
personzentriertes**

Konzept

kann

universell sein.

Eine
personzentrierte
Diagnostik sollte
personzentriert
sein!

Danke für ihre
Aufmerksamkeit !
